Cadet Matthew Nagle, U.S. Coast Guard Academy

## **Executive Summary**

---

The Community Action Plan to a Complex Coordinated Terrorist Attack is an amalgam of doctrinal tenets and recommended actions taken from Department of Homeland Security and Department of Justice resources, applicable FEMA courses, and publications and teachings of professional organizations of first responders (law enforcement, fire services, emergency medical services, and communications).

The Action Plan also incorporates After Action Review recommendations, “lessons learned,” and acknowledged best practices taken from After Action Reviews of prior Complex Coordinated Terrorist Attacks, terrorist attacks, and Active Shooter Incidents. It addresses suggested terrorist tactics found in extremist literature and online publications.

The result is a listing of recommended tasks or considerations for communities throughout the United States to increase the preparedness of communities to respond to a Complex Coordinated Terrorist Attack.

Community leaders are encouraged to jointly review the recommendations and to determine applicability to their jurisdictions. It is intended that elected officials, county sheriffs, police chiefs, fire chiefs, public works directors, communications directors and emergency medical service chiefs and leaders from hospitals, medical facilities, and local representatives from Volunteer Organizations Active in our Nation’s Defense (VOADs), meet and work together with State and Federal agency representatives to conduct a critical assessment of the applicability of these recommended actions to their current preparedness.

Through this review/discussion, these community leaders can eliminate those actions that have already been accomplished or that do not apply to their jurisdiction. They may amend recommendations to more appropriately serve their region. The resulting document should be a Community Action Plan, tailored to their jurisdiction, based on comprehensive research of doctrinal tenets, threat tactics, after action review recommendations, and acknowledged best practices.

Readers will note that assignment of responsibilities, target date for completion and status for each task are left to the communities to assign, based on their jurisdiction’s priorities and financial wherewithal.

The section on Training identifies Department of Justice, Department of Homeland Security, and other professional courses that can further assist communities in preparing for a Complex Coordinated Terrorist Attack.

As threat strategies and tactics will undoubtedly evolve over time, an “As of” date is printed on the coversheet of this document, to allow for further addition or amendment of recommendations and best practices.

## I. POLICY

---

### **Task 1.1. Establish an All-Hazards Standing Committee for the Region.**

**Discussion.** Focus this All-Hazards Standing Committee on integration of responder assets, organizations and disciplines to include Active Shooter/Hostile Events. Such a committee should include representation from local, state, and federal law enforcement; jurisdictional and county EMS; local fire and rescue; local and state emergency management; local public works; and local 911, public safety answering point (PSAP), dispatch, and communication.

**References.**

- *Improving Active Shooter/Hostile Event Response: Best Practices and Recommendations for Integrating Law Enforcement, Fire and EMS*, The InterAgency Board, September 2015, (page 9, para 4)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

### **Task 1.2. Create Opportunities for Joint Policy and Planning**

**Discussion.** Pursue opportunities for integrated policy discussions and joint planning among stakeholders, which will lead to accepted regional and jurisdictional policies, plans and procedures among law enforcement/fire/EMS/dispatch/public works.

**References.**

- *Improving Active Shooter/Hostile Event Response: Best Practices and Recommendations for Integrating Law Enforcement, Fire and EMS*, The InterAgency Board, September 2015, (page 9, para 1)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

### **Task 1.3. Enact and Enforce Regional and Agency-Specific Policies to Prohibit Self-Dispatch of Assets**

**Discussion.** Self-dispatch (over convergence) remains a significant issue affecting scene control, stabilization, security, and logistics. Self-dispatch violates the tenets of the National Incident Management System and the Incident Command System. It increases the threat of “blue on blue” engagements. Responder agencies in law enforcement, fire services, EMS and public works should enact and enforce policies to prohibit self-dispatch.

- *Boston Marathon AAR*, p. 118
- *Broome County, NY Shooting AAR*, Area 2

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

*Community Action Plan to a Complex Coordinated Terrorist Attack*

**Task 1.4. Enact a Statute to Limit Liability for Citizens Submitting Suspicious Activity Reports.**

**Discussion.** Draft and enact a statute that limits the liability for citizens who report indicators of potentially violent behavior.

**References.**

- *Community-Based Approaches to Prevention: A report on the 2014 National Summit on Preventing Multiple Casualty Violence*, U.S. Department of Justice, Community Oriented Policing Services, ISBN: 978-1-932582-97-0, (2015), (page 21, Recommendation 8)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 1.5. Enact a Statute for Pertinent Professions to Report Indicators of Potentially Violent Behavior.**

**Discussion.** Enact a statute establishing affirmative requirements for pertinent professions to report bona fide indicators of potentially violent behavior.

**References.**

- *Community-Based Approaches to Prevention: A report on the 2014 National Summit on Preventing Multiple Casualty Violence*, U.S. Department of Justice, Community Oriented Policing Services, ISBN: 978-1-932582-97-0, (2015), (page 21, Recommendation 5)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 1.6. Authorize Dispatchers to Proactively Assist Incident Commanders in Response Actions.**

**Discussion.** Dispatchers are a valuable resource to responding agencies. They are ideally positioned to collect and disseminate key information, enhance situational awareness and establish a common operating picture. Dispatchers should be authorized to proactively assist Incident Commanders in response actions and be provided written parameters to:

1. Prompt Incident Commanders for key actions
2. Alert and notify agencies and key personnel of incidents
3. Call in off-duty personnel
4. Notify hospitals
5. Call wreckers in rotation to clear routes of access and egress

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

*Community Action Plan to a Complex Coordinated Terrorist Attack*

**Task 1.7. Integrate Standard Operating Procedures (SOPs) Between Response Agencies**

**Discussion.** Establish unified Standard Operating Guidance/Procedures for public safety response to high threat incidents including active shooter, fire as a weapon, and IED/explosives. SOPs should be coordinated with other responding services to ensure that there are no conflicts and that there is a clear understanding of how each service will respond. Avoid “stove piping” of information.

- FEMA *Planning for a CCA: Guide for Local Jurisdictions*, (Slide: Benchmarks – High Threat, bullets 1 and 2)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 1.8. Policy – Sharing Information Under HIPAA**

**Discussion.** Establish and disseminate a policy on information sharing to inform health care practitioners, hospitals, and other medical facilities to alleviate perceived barriers to sharing information under the Health Insurance Portability and Accountability Act (HIPAA), Family Educational Rights and Privacy Act (FERPA) and the Privacy Act.

**Reference.**

- *Strategic Approaches to Information Sharing*, U.S. Department of Justice, Office of Community Oriented Policing Services, (2013) (page 13, Recommendation 4)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 1.9. Create a Mental Health Support Policy for Responders.**

**Discussion.** Create an agency-supported Mental Health Support Policy that addresses a structural support framework established prior to incidents; recommended actions that may be taken during the incident to mitigate the psychological impact on responders; actions immediately following the emergency; and long-term support for both responder and family. Identify resources available to the responder both in community and through professional organizations.

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

*Community Action Plan to a Complex Coordinated Terrorist Attack*

**Task 1.10: Policy - Common Keys for Police Cruisers**

**Discussion.** Establish procedures for leaving keys in vehicles or having master keys to move vehicles after initial response. A common problem is responding patrol cars parked on avenues for access and egress. Patrol cars are left blocking roadways and preventing access by ambulances and other resources. To address this, police departments/sheriff's offices should consider using a common car key for police units to enable other officers to move vehicles as required.

**Status:**

## II. PLANNING

---

### Task 2.1. Review the Jurisdiction's Emergency Operations Plan (EOP) and any Existing Supporting Plans.

**Discussion.** A jurisdiction's base EOP or supporting plans will address many of the responsibilities and actions taken during a CCTA, as they are required regardless of the specific threat (CCTA) or hazard.

**References.**

- DHS *Planning Considerations: Complex Coordinated Terrorist Attacks* Washington D.C., July 2018, (page 12, Goal 4)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

### Task 2.2. Identify Potential Consequences and Impacts of a CCTA on the Community/Region

**Discussion.** Conduct a Risk Assessment of a CCTA using existing Threat and Hazard Identification and Risk Assessment (THIRA) analysis. Review/use capability assessments and after action reviews to inform/assist planning efforts.

**References.**

- Federal Emergency Management Agency, *CPG 201: Threat and Hazard Identification Risk Assessment Guide, Third Edition* (Washington, DC),
- DHS *Planning Considerations: Complex Coordinated Terrorist Attacks* Washington D.C., July 2018, (page 11)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

### Task 2.3. Conduct a Joint CBRNE Threat Assessment

**Discussion:** The purpose of the joint threat assessment is to determine the likelihood of an intentional incident and identify response actions that should be performed by law enforcement and public health. It is recommended that the joint threat assessment be conducted by a conference call and, at a minimum, include the following representatives: Law enforcement (trained in WMD response), Public health (epidemiologist, clinician, laboratorian), Communications (law enforcement and public health). The agenda of the conference call may include: incident briefing by public health, explanation of concern by public health, update on confirmed or suspected cases, demographic information: gender, age, race, ethnicity, occupation, religious affiliation, membership in any groups or associations, description of where patient lives (e.g., urban, rural), patient's recent travel history (e.g., domestic or international), recent activities that may be related to exposure and illness, current laboratory test results, hypotheses regarding source of exposure, syndromic surveillance: any unusual patterns of disease presentation or geographical clustering of disease. Law enforcement information / intelligence: information on existing threats in the jurisdiction (WMD or otherwise), WMD intelligence that may be

*Community Action Plan to a Complex Coordinated Terrorist Attack*

connected to patient's exposure (e.g., religious affiliation, group, association), intelligence regarding acquisition or intended use of any biological threat agent, which may be related to the patient's symptoms.

**References:**

- *Joint Criminal and Epidemiological Investigations Handbook, FBI/CDC,* (page 54)

**Responsibility:**

**Assisted by:**

**Target Date: Task 2.4. Identify Goals and Objectives of a CCTA Response Plan**

**Discussion.** Determine goals and objectives of CCTA response. These goals and objectives will contribute to the development of potential courses of action in plan development.

**References.**

- *DHS Planning Considerations: Complex Coordinated Terrorist Attacks* Washington D.C., July 2018, (page 11)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 2.5. Identify Operational Priorities in Response to a CCTA**

**Discussion.** Develop and reach agreement on operational priorities during response to a CCTA.

**References.**

- *DHS Planning Considerations: Complex Coordinated Terrorist Attacks* Washington D.C., July 2018, (page 11)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 2.6. Pre-Identify and Map Regional Staging Areas and Rally Points.**

**Discussion.** In coordination with region's law enforcement, fire services, EMS, and public works agencies, designate and label staging areas and rally points throughout the region. Provide this information to Dispatch. This allows Dispatch to easily activate during incidents and help limit negative aspects of self-dispatch/over-convergence and direct responding resources/assets from outside the region to suitable staging areas.

**References.**

- *Improving Active Shooter/Hostile Event Response: Best Practices and Recommendations for Integrating Law Enforcement, Fire and EMS,* The InterAgency Board, September 2015, (page 13, para 1, bullet 10 and page 14, para 2, bullet 1)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

*Community Action Plan to a Complex Coordinated Terrorist Attack*

**Task 2.7. Conduct Agency Inventories of Assets by Resource Type.**

**Discussion.** Establishing an interoperable resource inventory and maintaining the currency and accuracy of resource information is key in effective resource management. First Responder agencies in the region should conduct an inventory of assets by resource type and enter it into IRIS for ready reference in the event of an Active Shooter or Complex Coordinated Terrorist Attack. Update this information as changes are made. Conduct an annual review to ensure accuracy of the information provided in the Incident Resource Inventory System (IRIS).

IRIS is a distributed software tool, provided at no-cost by FEMA. It is standards-based and allows for the seamless exchange of information with other instances of IRIS and with other standards-based resource inventory and resource management systems. IRIS allows users to identify & inventory their resources, consistently with National Incident Management System (NIMS) resource typing definitions, for mutual aid operations based on mission needs and each resource’s capabilities, availability, and response time. IRIS automatically uses the national NIMS resource typing definitions cataloged in the Resource Typing Library Tool (RTLTL). IRIS stores data locally on the user’s computer or on the user’s network if configured during installation.

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 2.8. Develop/Update List of High Priority Targets in the Jurisdiction.**

**Discussion.** In accordance with the jurisdiction’s Threat and Hazard Identification Threat Assessment (THIRA), identify high priority, at-risk targets. Establish plans and assign responsibilities to provide security in heightened threat environment.

**References.**

- DHS *Planning Considerations: Complex Coordinated Terrorist Attacks* Washington D.C., July 2018, (page 12, Goal 4)
- *PER-335: Critical Decision Making for Complex Coordinated Attacks, Participant Workbook*, (page 2-34)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 2.9. Develop/Update List of Soft Targets in the Jurisdiction.**

**Discussion.** In accordance with the jurisdiction’s THIRA, identify those soft targets in the jurisdiction at which there would be a high concentration of people with little to no security forces present (e.g., malls, churches, schools, sports venues, theaters, etc.)

*Community Action Plan to a Complex Coordinated Terrorist Attack*

**References.**

- *PER-335: Critical Decision Making for Complex Coordinated Attacks, Participant Workbook*, (page 2-10)
- *DHS Planning Considerations: Complex Coordinated Terrorist Attacks* Washington D.C., July 2018, (page 12, Goal 4, Objective 4.1 and 4.2)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 2.10. List Names/Contact Information of Key Community Leaders.**

**Discussion.** During an incident, senior staff, local, state and Federal elected officials should be quickly notified. This can be done by Incident Command, Dispatch or the JIC and should be noted in the response plans. Community leaders and elected officials may be targeted in incidents of terrorist attacks. Should credible threat information be received, the jurisdiction should maintain a contact list to inform/advise community leaders both to assist in response should the need arise and to increase their security awareness.

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 2.11. Determine Special Operations/Tactical Teams Response Times.**

**Discussion.** The timeliness of the tactical response and the type and number of teams called in to support incident response is a critical aspect of planned response.

**References.**

- *Unified Regional Response Framework: Multidiscipline Response to a Complex Terrorist Attack*, [Pre-Decisional Draft] (pages 8-13)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 2.12. Identify Infrastructure Critical to the Jurisdiction.**

**Discussion.** Identify the critical infrastructure in the region that impacts the jurisdiction. This is not simply the Federally-mandated Tier I and Tier II critical infrastructure, rather a listing of those local assets, systems, and networks, whether physical or virtual, are considered so vital [to the region/jurisdiction] that their incapacitation or destruction would have a debilitating effect on security, national economy, public health or safety. Consider as well that infrastructure located outside of the jurisdiction the loss of which may result in cascading effects impacting the local community.

*Community Action Plan to a Complex Coordinated Terrorist Attack*

**References.**

- DHS *Planning Considerations: Complex Coordinated Terrorist Attacks* Washington D.C., July 2018, (page 12, Goal 4, Objective 4.1 and 4.2)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 2.13. Develop a Regional Contact List/Data Base of Critical Infrastructure Stakeholders.**

**Discussion.** Identify those personnel with purview over the operation and security of critical infrastructure impacting the jurisdiction. The Regional CIKR list should include more than Tier I and Tier II critical infrastructure, addressing that critical infrastructure significant to the region and local communities.

Recommend this list be provided to local law enforcement agencies, regional fusion centers, and DHS Protective Security Advisors in addition to inclusion in the Texas Infrastructure Protection (TX-IP) Community of Interest.

**References.**

- *Texas Critical Infrastructure Security and Resilience Plan*, Texas Department of Public Safety, 2014. (page 80)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 2.14. Identify Trigger(s) to Activate the Area Command in the Event of a Complex Coordinated Terrorist Attack.**

**Discussion.** The jurisdiction's CCA Response Plan should specify what conditions merit activation of the Area Command and who will make that decision.

**References.**

- FEMA *Planning for a CCA: Guide for Local Jurisdictions*, (Slide: Benchmarks – Command, bullet 1)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 2.15. Identify the Trigger to Activate the Emergency Operations Center in the Event of a Complex Coordinated Terrorist Attack.**

**Discussion.** The jurisdiction's CCA Response Plan should specify what conditions merit activation of the Area Command and who will make that decision

**References.**

- FEMA *Planning for a CCA: Guide for Local Jurisdictions*, (Slide: Questions to Consider, bullet 2)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 2.16. Public Health Officials Should Have Immediate Triggers For Information Exchange With LE Officials.**

**Discussion:** Public health and law enforcement are encouraged to notify and involve each other early in a potential investigation of a biological threat, even if it turns out to be a non-criminal event. During a biological threat, certain information or a specific event should trigger the exchange of information between law enforcement and public health. These include: any specimens or samples submitted to public health for analysis that test positive for a potential biological threat-related agent, large numbers of patients with similar symptoms or disease, large numbers of unexplained symptoms, diseases, or deaths, disease with an unusual geographic or seasonal distribution (e.g., tularemia in a non-endemic area), unusual disease presentation (e.g., inhalational vs. cutaneous anthrax), endemic disease with unexplained increase in incidence (e.g., tularemia, plague), death or illness in humans preceded or accompanied by death or illness in animals that is unexplained or attributed to a zoonotic biological agent, unusual “typical patient” distribution (i.e., several adults with an unexplained rash).

**References:**

- *Joint Criminal and Epidemiological Investigations Handbook, FBI/CDC, p. 48.*

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 2.17. LE Officials Should Have Immediate Triggers For Information Exchange With Public Health Officials.**

**Discussion:** The following law enforcement observations should result in the automatic notification of public health officials: any intelligence or indication that any individual or group is unlawfully in possession of any biological agent, seizure of bio-processing equipment from any individual, group, or organization, seizure of potential dissemination devices from any individual, group, or organization, identification or seizure of literature pertaining to the development or dissemination of biological agents, any assessments that indicate a credible biological threat exists in an area, a HAZMAT response that involves the presence of biological agents.

**References:**

- *Joint Criminal and Epidemiological Investigations Handbook, FBI/CDC, (page 52)*

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 2.18. Identify Private Sector Services, Personnel and Resources.**

**Discussion.** The jurisdiction/region’s response plans identify services, personnel and resources available from the private sector, community, and non-profit organizations with 24 hour contact information. This information is made available to both Dispatch and Emergency Operations Centers.

*Community Action Plan to a Complex Coordinated Terrorist Attack*

**Status**

### III. INCIDENT COMMAND

---

#### Task 3.1. Establish Unified Command.

**Discussion.** Establish Incident Command as soon as the initial fires responder arrives on scene. Focus on providing a coordinated response that ensures law enforcement, fire services, emergency medical services and public works operate together. Stage co-responding agency representatives within arms' reach to facilitate communications and clear direction.

**References.**

- *Improving Active Shooter/Hostile Event Response: Best Practices and Recommendations for Integrating Law Enforcement, Fire and EMS,* The InterAgency Board, September 2015, (page 13, bullets 1 and 2)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

#### Task 3.2. Develop and Implement ASHE-Specific Unified Incident Command Boards.

**Discussion.** Incident command boards are a portable incident scene management tool to help incident commanders organize and manage information and resources to support decision making.

**References.**

- *Improving Active Shooter/Hostile Event Response: Best Practices and Recommendations for Integrating Law Enforcement, Fire and EMS,* The InterAgency Board, September 2015, (page 15, para 6)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

#### Task 3.3. Train Law Enforcement Officers in Incident Command System

**Discussion.** An observable trend among Law Enforcement agencies is the lack of trained senior leaders in the Incident Command System – specifically a lack of training in ICS 300 and ICS 400. Recommend that this training be included as a prerequisite for promotion to lieutenant (ICS 300) and captain (ICS 400).

**References.**

- *National Incident Management System (NIMS)*

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

#### Task 3.4. Train Law Enforcement Officers in ICS Position-Specific courses.

**Discussion.** Train senior Law Enforcement officers to assume position-specific positions as Incident Commander, Operations Section Chief, and Intelligence Section Chief. Afford additional personnel position-specific training for Staging Manager and Tactical Group Supervisor, Perimeter Group Leader, et al. Ensure that this information is known to Dispatch.

*Community Action Plan to a Complex Coordinated Terrorist Attack*

**References.**

- *PER-335: Critical Decision Making for Complex Coordinated Attacks, Participant Guide*, Version 1.1 revision 2 (Pages 2-15).
- SETRPC CCTA Tactical Response Workshop, Beaumont, Texas (May 2018)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 3.5. Develop Capacity to Establish an Agency-Internal Law Enforcement-Dominant Incident Command Structure.**

**Discussion.** Local agencies cannot depend solely upon Regional Incident Management Teams to assume ICS responsibilities for all significant terrorist incidents. Law enforcement agencies will be called upon to fill key positions in Incident Command structure during terrorist attacks.

**References.**

- SETRPC CCTA Tactical Response Workshop, Beaumont, Texas (May 2018)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 3.6. Train First Responders to Serve in the ICS Intelligence Section.**

**Discussion.** Recruit law enforcement investigators, fire marshals, intelligence analysts, and other selected officials to receive position-specific training to fill key positions in the Incident Command's Intelligence Section during a terrorist attack. Detectives and investigators should be well-versed in ICS, especially their position-specific IMT roles. Ensure that these individuals are provided with a Secret-level security clearance

**References.**

- *Orlando AAR*, (page 27)
- *Washington Navy Yard*, (page 79)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 6.26. Establish a Law Enforcement Medical Coordinator (LEMC) within the Incident Command Structure.**

*Note: This recommendation is restated in the Medical Response Section.*

**Discussion.** Establish a Law Enforcement Medical Coordinator (LEMC) within the Incident Command structure to coordinate and de-conflict EMS resources with law enforcement response to a large incident(s). Creating an LEMC position ensures proper allocation of both human and medical assets. The LEMC would oversee resource need and distribution among operational teams. The LEMC ensures proper allotment of resources regardless of the duration of operations. The use of the LEMC allows the SWAT medic to focus solely on providing emergency aid within the hot zone, knowing that the coordination is being managed by a professional who understands the scene, its evolution, and their needs. Ideally this position would be filled by an active or former tactical medical provider – preferably a physician with knowledge of both the tactical and EMS

**FOR OFFICIAL USE ONLY**

*Community Action Plan to a Complex Coordinated Terrorist Attack*

functions. The LEMC provides the commander with critical information that may be overlooked by the traditional medical branch of the ICS. The LEMC will possess the ability to conduct an in-depth medical threat assessment using operational data gathered by law enforcement. The LEMC provides a conduit to both EMS and fire assets as well as providing operational input to the incident commander.

## IV. PUBLIC INFORMATION

---

### Planning

#### **Task 4.1. Establish a Media Strategy for Active Shooter/Terrorist Attacks**

**Discussion.** Incident Commanders and PIOs should plan for a media strategy focused on the following three objectives:

1. Ensure Public Safety
2. Generate leads to identification/location of the attackers
3. Establish Unified Messaging – a unified Public Information Team

**References.**

- SA Michelle Lee, FBI Presentation on Austin, Texas Bombings, 2018 ALERRT Conference, Grapevine, Texas (November 2018)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

#### **Task 4.2. Establish a Media Relations Plan**

**Discussion:** In advance of any incident, consider how best to control media access to and distance from the event, crime scene, first responders and other public safety personnel, victims, and family members. Direct the press to a designated area, a significant distance away from the event that does not interfere with first-responder or incident command operations. A Press Information Officer (PIO) should be assigned to establish contact with the media and provide timely information as appropriate, at a distance from the event or operations. Provide the media with the communications platforms (toll free numbers, incident website, and/or social media) used to deliver public updates (incidents status, road closures) for the public to report suspicious activity or event related or other relevant information.

**References:**

- *First Responder's Toolbox*, National Counter Terrorism Center

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

#### **Task 4.3. Create a Regional Listing of Public Information Officers**

**Discussion.** Create a regional listing of public (federal, state, tribal, territorial and local) and private agency PIOs that may be called upon to assist during major incidents. Information may include name, agency, jurisdiction, email, telephone numbers, work and home addresses, and level of training.

**References.**

**Assisted by:**  
**Status:**

**Task 4.6. List Serve for Local Media Representatives.**

**Discussion.** Develop a contact list/list serve for regional media representatives for radio and television to facilitate information sharing during and in an incident's aftermath.

**References.**

- *FEMA Planning for a CCA: Guide for Local Jurisdictions*, (slide 24)

**Responsibility:**  
**Target Date:**

**Assisted by:**  
**Status:**

**Task 4.7. Establish "Go Kits" for Public Information Officers**

**Discussion.** In addition to the typical contents recommended at [www.ready.gov](http://www.ready.gov), the following are recommended contents for a Public Information Officer "Go Bag":

- Smart Phone with charger
  - Includes Contact Information for PIOs in region
- Laptop Computer with charging apparatus
- Digital Camera
- Wi-Fi Hotspot
- Thumb Drive(s)
- Combination printer/scanner/facsimile (fax)

Community Action Plan to a Complex Coordinated Terrorist Attack

- Pencils/Pens/Markers
- Paper

- SETRPC CCTA Public Information Officers Workshop, Beaumont, Texas, (March 27-28, 2018)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 4.8. Plan/Equip to Establish a Public Information Command Post**

**Discussion.** Plan to establish a Public Information Command Post remote from the crime scene in a major incident. Reporters want access to a “talking head” and the ability to video something for the electronic media. Establishing a press command post that provides regular briefings and the ability to photograph police activities from a distance usually satisfies that need. PIOs should not set up within the incident command post as this may interfere with command and control operations.

**References.**

- *Aurora AAR*, (page 98)

**Responsibility.**

**Assisted by:**

**Target Date:**

**Status:**

**Task 4.9. Construct Synchronization Matrix for Public Information Officers.**

**Discussion.** Provide PIOs with a synchronization matrix listing key tasks in accordance with their Incident Command responsibilities to be accomplished aligned with phases of response to a Complex Coordinated Terrorist Attack. This matrix is graphic representation of planned actions aligned to time and/or events. It facilitates the integration of planning and resources and manages the alignment of available capabilities to each task. The synchronization matrix: provides a quick aid to decision making; shortens reaction times; acts as a blueprint for response to a variety of contingencies; provides continuity to staff and decision makers in the absence of key personnel; and lessens the impact of stress and sleep deprivation by providing a previously determined series of actions.

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 4.12 Priority to Local Media.**

**Discussion.** Local media should be allowed to do interviews first, before the national media is accommodated. The information is more important to get out locally, and the local media has more of a vested interest – thus, they will be covering the story for a long time after the national media representatives leave.

**References.**

- *Aurora AAR*, (page 99)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 4.13. PIOs and Agencies Incorporate “Don’t Name Them.”**

**Discussion.** Don’t make murderers famous. As a tenet of public communications, avoid the use of the terrorist/criminal’s name(s) and background in public announcements and presentations. Focus instead on providing information on the survivors and victims and heroes involved.

**References.**

- [www.DontNameThem.org](http://www.DontNameThem.org)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

## Messaging

### Task 4.14. Provide Public Messaging for the Whole Community.

**Discussion.** Plan and train to ensure timely and accurate public messages are provided to the whole community including those with accessibility needs (i.e., deaf/hard of hearing, blind/low vision, English as a second language, etc.).

**References.**

- *FEMA, Planning for a CCA: Guide to Local Jurisdictions*,(page 25)

**Responsibility.**

**Assisted by:**

**Target Date:**

**Status:**

### Task 4.15. Citywide Traffic Updates.

**Discussion.** PIOs should remain mindful of the impact the incident may have on citywide traffic. Street and road closures are inevitable; however ensure an individual is tasked with monitoring citywide traffic and providing the public and media with regular updates as to the street and road closures resulting from the emergency response.

**References.**

- *Washington Navy Yard AAR*, (page 77)

**Responsibility.**

**Assisted by:**

**Target Date:**

**Status:**

### Task 4.16. Create “Fill in the Blank” Emergency Message Templates.

**Discussion.** Frame emergency messages likely to be used in incidents with “fill in the blanks” for situational details. Do so for use in media releases, social media platforms (Twitter, Facebook, NextDoor, and others). Translate these messages into common languages used in that region. PIOs would already have these templates available. They would assist in focusing PIOs on what information was key to its content. This can be a plus in times where PIOs are in situations of extreme stress and/or sleep deprivation. Such emergency messages should include:

- Evacuation Instructions
- Shelter-In-Place Instructions
- Avoid these areas
- Instructions to Responding Units
- Call for Blood Donations
- Information on Donations
- Guidance for Volunteers
- Missing Persons Hotline
- Family Assistance Center
- Transition of Family Assistance Center to Long Term Care

Template messages may be kept on a thumb drive or in paper copy in a PIO’s notebook or may be kept on the jurisdiction’s web site in a “blind” segment (example: [beaumontexas.gov/PIO/](http://beaumontexas.gov/PIO/)) known only to the PIO.

*Community Action Plan to a Complex Coordinated Terrorist Attack*

**References:**

- SETRPC CCTA Public Information Officers Workshop, Beaumont, Texas (March 27-28, 2018)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 4.17. Establish an Incident Web Page for use during incidents.**

**Discussion.** This web page would be set up in advance to allow ready activation during incidents.

- Construct the web page so that it may be used by persons with sensory disabilities
- Activation of the Incident Web Page would also cause the creation of an associated banner across the jurisdiction's home web page. This banner would be color coded: Yellow – Advisory; Red – Warning and provide a direct link to the Incident Web Page
- The Incident Web Page would be linked to other jurisdictions as needed to facilitate a "single message" approach to official information regarding the incident
- Consider including the following on the Incident Web Page:
  - Provide factual synopsis/updates of the incident with information approved by the Incident Command
  - Provide "call in" telephone number for the public allowing them provide information/intelligence to the Incident Command
  - Post Emergency Messages with date/time groups
  - Embed the jurisdiction's official Twitter enabling readers to see past and current Tweets
  - Post the time, date, and location for the next Press Conference
  - Provide information on parameters/rules to attendance at Press Conference (i.e., maximum of two credentialed media representatives (reporter and cameraman) per network with priority given to local media stations)
  - Post the questions and answers being posed by media for easy, ready reference
  - Provide a telephone number or email address to accept media questions
  - Post photos of the incident taken by jurisdiction's photographers/PIOs for media use

## **Use of Social Media**

### **Task 4.22. Plan for use of Social Media to Pass Information to the Public.**

**Discussion.** The following are recommendations for use of social media platforms made by Public Information Officers at the:

- Establish use of social media before any incident. Use in day-to-day operations to get the word out.
- Ensure accuracy of messages
- If multiple agency involvement, decide if a joint account is needed for Facebook, Twitter, etc.
- Determine release authority and approval process
- Obtain pre-delegated release authority
- Establish texting group (“Group Me”) to provide information and stay in contact with area PIOs
- Identify back up plans for social media release should power go out or communications go down
- Identify partners for streamlined release workarounds
- “Know your audience” to identify best social media platforms to use
- Balance transparency with the need to know
- Avoid publishing operational tactics – focus on what the public needs to know (safety focus)
- Use Facebook and respond to all posts: designate someone to monitor inappropriate comments
- Use social media to distribute media advisory information for press conferences and avoid overflow of phone calls
- Use social media to get out information on road closures and restrictions
- If victims of incidents reply on social media, pass their location(s) and information to the appropriate ICS operations element

**Status:**

**Task 4.23. Social Media Monitoring.**

**Discussion.** Assign/Establish agency/position responsibilities to monitor media and social media outlets in order to quickly correct mistaken or inaccurate information. There may also be investigative benefits, such as identifying potential witnesses (Navy Yard workers were posting information on their Twitter accounts.) Use of social media platforms such as Twitter, Facebook, YouTube, Instagram, Periscope, Flickr, and NextDorr.com, and others has become critical for releasing timely and accurate information both to the public and to the traditional media. By being active on social media leading up to critical incidents, law enforcement agencies can better inform the public.

**Status:**

***Joint Information System/Joint Information Center***

**Task 4.24. Plan for Joint Information Center (JIC) to Ensure Coordinated Public Messaging.**

**Discussion.** Plan and practice establishment of a Joint Information Center to manage large incidents to ensure that all public messages, including those distributed through social media are coordinated and validated. Identify what position is tasked with leading the JIC and what agencies contribute to its staffing. A JIC would have primary responsibilities of coordinating messages across and between agencies and jurisdictions – for both traditional media and social media platforms. The JIC would also serve to provide periodic briefings between press conferences to satisfy the media’s needs for most updated information.

**References.**

- *Boston Marathon AAR*, (page 107 and 121)
- *Aurora AAR*, (page 99)
- *San Bernardino AAR*, (page 117)

**Responsibility:**  
**Target Date:**

**Assisted by:**  
**Status:**

**Task 4.25. Hospital/JIC Integration.**

**Discussion.** Establish formal protocols for ensuring the appropriate representatives from the area hospitals are integrated into the JIC.

*Community Action Plan to a Complex Coordinated Terrorist Attack*

**References.**

- *Washington Navy Yard AAR*, p. 81

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 4.26. Create a Texting Group for Regional Public Information Officers.**

**Discussion.** In order to immediately establish communications and coordination among the area’s Public Information Officers, and use it in day-to-day operations – don’t wait until a major incident occurs. Use the Texting Group to stay on track, maintain awareness, and establish unified message. During an incident, the PIO Texting Group allows communication with one another at various incident sites, media staging areas, Joint Information Center, and other locations. Restrict this to PIOs and do not allow access by media.

- *SETRPC CCTA Public Information Officers Workshop*, Beaumont, Texas (March 27-28, 2018)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Training and Exercises**

**Task 4.27. Train Public Information Officers – Both Primary and Alternate.**

**Discussion.** FEMA provides free training for Public Information Officers. Agencies cannot always be sure that their assigned PIO will be present, on-scene for a no-notice incident. Agencies are advised to build depth in their organization by training alternate PIOs to fill in or assist in the event of an emergency/disaster. Current FEMA courses include:

- **G290 – Basic Public Information Officer.** This two-day course will consider the value of communication before, during and after an incident. It will help PIOs identify critical audiences, both internal and external. This course covers basic skills and techniques for use during small, localized, single-agency responses; preparedness campaigns; and escalating localized responses.
- **G291/E-L0387 – Joint Information System/Joint Information Center Planning for Tribal, State and Local PIOs.** This one-day course will outline the communications needed for different incidents and define the roles of the PIO within ICS. The E/L 0387 is the course version we often offer on-campus just prior to the 0388 course for students who don’t have access to the training in their states.
- **E/L0388 Advanced Public Information Officer.** The advanced level course teaches participants additional skills for use during escalating incidents, including strategic communications and incident action planning as it relates to Joint Information Center (JIC) operations.

**Target Date:** **Status**

**Task 4.28. IMT Training for Region’s Public Information Officers.**

**Discussion.** Ensure that the appropriate public information officers and public affairs personnel receive position-specific Incident Management Team training. The lead of the JIC should be identified early on during establishment of the JIC. It is prudent that this individual should possess ICS/IMT training in order to ensure that all JIC responsibilities are properly managed.

References.

- *Washington Navy Yard AAR*, (page 80)

**Responsibility:** **Assisted by:**  
**Target Date:** **Status:**

**Task 4.29. Offer Public Information Officer Training to Public Officials.**

**Discussion.** Agency and community leaders should be encouraged to take FEMA Public Information Officer training. Many times agency chiefs or a designated elected official will be asked to serve as the spokesperson or the “face” of incident response. The primary audience for this training is individuals who have public information responsibilities as their main job or as an auxiliary function at the federal, state, local, tribal or territorial level of government, and in the private and nongovernmental sectors. Training is free and applications may be submitted through the local Office of Emergency Management.

**Elected Officials and Community Leaders**

**Task 4.31. Provide PIO Liaison to Public Officials.**

**Discussion.** When possible, identify a PIO-trained liaison to work with and coordinate the involvement of elected officials. Liaisons should be at the scene, not in the office, as this is where many politicians will likely be located. The liaison can help officials stay focused on predesignated duties and responsibilities rather than being involved in scene or on camera when such involvement is outside the scope of the official’s jurisdictions or duties. The liaison can help steer officials away from comments that might inadvertently affect ongoing investigations.

## V. TACTICAL RESPONSE

---

### *Policies and Protocols*

#### **Task 5.1. Deployment Authority in Mutual Aid Agreement.**

**Discussion.** Deployment authority for law enforcement tactical assets in response to a CCTA should be pre-approved by each agency's leadership and clearly addressed in the applicable Mutual Aid Agreement.

**References:**

- *Unified Response Framework: Multidiscipline Response to a Complex Coordinated Terrorist Attack, [Pre-Decisional Draft], (page 10)*

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

#### **Task 5.2. Establish a Tactical Reserve.**

**Discussion.** In order to guard against acts of deception, diversions, false reports and subsequent over commitment of assets, Dispatch and law enforcement agencies should establish policies to hold resources in reserve (tiered response) at the outset of response efforts. Unassigned officers and resources may be sent to a rally point or staging area to establish a tactical reserve.

**References:**

- Joint Counterterrorism Assessment Team, *CounterTerrorism Guide for Public Safety Personnel*. National CounterTerrorism Center, (page 18)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

#### **Task 5.3. Protocol for Emergency Vehicle Parking.**

**Discussion.** Establish guidelines on access, parking, and staging vehicles to facilitate the transit of vehicles to the scene, especially large fire trucks. Create a protocol on parking emergency vehicles when responding to a major incident so as not to block access by ambulances and other responders. In this protocol, incorporate procedures to establish a travel lane(s) for ambulances.

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 5.14. Identify/Assign a Senior Tactical Advisor.**

**Discussion.** Whenever possible, a senior tactical advisor should be designated and assigned to the primary operations center (this may initially be Dispatch) to advise decision makers of the needs and allocation of tactical resources to incident sites. Dispatch must maintain current contact numbers and should be clear on that advisor's role in activating tactical Mutual Aid Agreements.

**References:**

- *Unified Response Framework: Multidiscipline Response to a Complex Coordinated Terrorist Attack*, [Pre-Decisional Draft], (page 9)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 5.15. Plan for Responder Rest and Recovery.**

**Discussion.** Incorporate protocols in plans to ensure responders receive appropriate rest and mental health support. When possible, officers exposed to high levels of trauma should be relieved by officers who were off-duty when the incident occurred.

**References:**

- *Aurora AAR*, (page 33)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

*Community Action Plan to a Complex Coordinated Terrorist Attack*

**Task 5.16. Critical Incident Counseling and Mental Health Support**

**Discussion:** Ensure that the agency has a policy regarding mental health support after critical incidents and clearly communicate it to the entire department. Assign a mental health or officer wellness officer to oversee officer mental health and coordinate services among participating agencies. Compel participation in critical incident debriefings for both victims, civilians, and commissioned staff. Consider follow-up counseling as it is not unusual for post-traumatic stress to manifest itself several weeks or months after an event. Have supervisors monitor and check-in with members to determine if they have a need for mental health provider services. Ensure all responders are aware and encouraged to use the services as needed. Require all responding members to attend a stress management session debriefing following a traumatic incident. In addition to mental health assistance, consider unit, team, or department-level briefings to bring closure to the incident.

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 5.23. Designate Rally Points**

**Discussion.** To avoid over-convergence but to allow for the collection and organization of responders close to the incident site, plan pre-designated rally points. Include these in written plans and provide locations and designating numbers (RP1, RP2, etc.) to Dispatch.

**References.**

- *Improving Active Shooter/Hostile Event Response: Best Practices and Recommendations for Integrating Law Enforcement, Fire and EMS*, The InterAgency Board, September 2015, (page 14, para 2, bullet 1)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 5.24. Plan to Address Possible Diversionary Tactics**

**Discussion:** Attackers and associates may use diversionary tactics (i.e., hoax calls, swatting) to draw responders away from the intended primary target(s) of an attack. These tactics may be used as part of a complex or multipronged attack. Agencies should:

- Establish dispatch policies designed to hold resources in reserve (tiered responses);
- Provide situational updates to first responders to enhance safety; and
- Provide regular notifications to interagency partners and neighboring jurisdictions to provide a shared operational picture of possible diversionary acts.

**Target Date:**

**Status:**

***Equipment***

**Task 5.30. Establish a Regional Credentialing System.**

**Discussion.** Provide appropriate credentials to agency representatives in the region to ensure security at incident scene(s), staging areas, and operations centers.

**References:**

- *Unified Response Framework: Multidiscipline Response to a Complex Coordinated Terrorist Attack*, [Pre-Decisional Draft], (page 14)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 5.31. Maintain an Adequate Supply of Radio/Cell Phone Chargers/Batteries.**

**Discussion.** Due to the possible long duration of an incident, response partners may work long hours and use their communications equipment far more than anticipated. The ability to obtain fresh radio batteries and charge radio and cell phone batteries can become a critical need. In anticipation of this possibility, agencies should maintain an adequate supply or develop a streamlined process to obtaining radio and cell phone chargers and batteries.

**References:**

- *Boston Marathon AAR*, (page 97)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

*Community Action Plan to a Complex Coordinated Terrorist Attack*

**Task 5.32. Provide Law Enforcement Officers Access to Long Guns.**

**Discussion.** Law Enforcement officers should have ready access to rifles so that they have the greater stopping power higher magazine capacity, and the capability to fire accurately from a distance. Departments with patrol rifles and ruggedized optics with or without magnification would provide responding officers the means to match or overwhelm attackers with precision-aimed firepower.

**References.**

- *PER-335: Critical Decision Making for Complex Coordinated Attacks, Participant Guide, Version 1.1, revision 2, (page 2-27)*

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 5.33. Ensure Availability of Ammunition to Law Enforcement Officers.**

**Discussion.** Police departments should consider having easily accessible extra magazines pre-loaded with ammunition (patrol rifle, shotgun, and pistol) ready for deployment on short notice for police officers engaged in an extended gun battle with attackers.

**References.**

- *Unified Response Framework: Multidiscipline Response to a Complex Coordinated Terrorist Attack, [Pre-Decisional Draft], (page 5)*

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 5.34. Provide Body Armor to Responders.**

**Discussion.** The Department of Justice requires patrol use of protective vests if DOJ subsidized their purchase, but there is not requirement for additional ballistics protection. A policy of rapidly confronting the shooter increases the need for protective equipment. In addition to wearing protective vests, uniformed officers should carry active shooter armor kits. Responders should carry Level III or Level IV body armor for protection against high-powered, high velocity weapons.

**References.**

- *PER-335: Critical Decision Making for Complex Coordinated Attacks, Participant Guide, Version 1.1, revision 2 (Pages 2-27)*

**Status:**

**Task 5.35. Explore the Procurement/Deployment of an Equipment Truck.**

**Discussion.** Some patrol officers may patrol on foot, bikes, and/or motorcycle or other mode that does not allow for carrying large pieces or amounts of such equipment. Consider providing an equipment truck that is manned and ready for rapid deployment to any location in the jurisdiction during an incident. While

*Community Action Plan to a Complex Coordinated Terrorist Attack*

many police departments have long had the equipment issued to various officers throughout the department, the deployment of an equipment truck, standing by 24/7, is a practical approach that allows equipment to be ready, secured, and available to responding officers. This truck would hold various tools and equipment – such as breaching equipment, rifles, shotguns, Level III vests and helmets, compact shields, lights, batteries, etc. Also included would be active shooter armor kits (ballistic helmets and ballistic vests with ceramic plates) that afford greater protection from high-powered, semi- and fully automatic weapons and ammunition.

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 5.40. Incorporate Public Works Personnel as First Responders.**

**Discussion.** Often overlooked, public works personnel are designated as first responders by Presidential Homeland Security Directive 8, which states:

*The term "first responder" refers to those individuals who in the early stages of an incident are responsible for the protection and preservation of life, property, evidence, and the environment, including emergency response providers as defined in section 2 of the Homeland Security Act of 2002 (6 U.S.C. 101), as well as emergency management, public health, clinical care, public works, and other skilled support personnel (such as equipment operators) that provide immediate support services during prevention, response, and recovery operations.*

Public Works responders serve as a force multiplier. Leaders should be required to participate in planning, training, exercises, and response operations on a regular basis.

## VI. MEDICAL RESPONSE

---

### Policy and Protocols

#### Task 6.1 National Incident Management System (NIMS)

**Discussion.** Local and state law enforcement and emergency services should institutionalize the National Incident Management System (NIMS)-based command and control language through plans and exercises and during ongoing education and training.

**References.**

- *First Responder Guide for Improving Survivability in Improvised Explosive Device and/or Active Shooter Incidents.* Department of Homeland Security, Office of Health Affairs, June 2015, (page 6, “Response and Incident Management,” 1)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

#### Task 6.2. Adhere to the Tenets of the Hartford Consensus.

**Discussion:** Each medical institution must follow the Hartford Consensus protocol and adhere to the national policy to enhance survivability from active shooter and intentional mass casualty events.

**Reference:**

- *Hartford Consensus,* (page 8)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

#### Task 6.3. Interoperable Radio and Communications Equipment

**Discussion.** Local and state emergency management, EMS, fire, public works, and law enforcement personnel and receiving medical facilities should have interoperable radio and communications equipment.

**References.**

- *First Responder Guide for Improving Survivability in Improvised Explosive Device and/or Active Shooter Incidents.* Department of Homeland Security, Office of Health Affairs, June 2015, (page 6, “Response and Incident Management,” 2).

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

#### Task 6.4. Communications Liaison with Air Evacuation Helos

**Discussion.** Air Evacuation helicopters from a variety of organizations may be used to transport casualties to area hospitals for treatment. These may include helicopters from responding Federal law enforcement agencies, US Coast

*Community Action Plan to a Complex Coordinated Terrorist Attack*

Guard, and Department of Defense. In those cases that radio communications with hospitals is not interoperable with these aircraft, request a liaison with radio communications co-locate with the Law Enforcement Medical Coordinator/Officer or at the servicing hospital to effect communications and eliminate lags in response and treatment times.

**References.**

- CCTA Medical Response Workshop, Beaumont, Texas, June 2018.

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 6.5. Integrate Law Enforcement to Enhance Hospital Security.**

**Discussion:** Hospitals and law enforcement should meet to discuss the circumstances under which law enforcement may be assigned to enhance hospital security and establish protocols to integrating local law enforcement into their security plans. Hospitals should consider options for contracting additional security personnel when needed. .

**Target Date:**

**Status:**

**Task 6.6. Protocol for First Responders Under Fire**

**Discussion:** Develop protocols for all first responder groups (Law enforcement, Fire, EMS, etc.) and train them on immediate actions/response to weapons fire and bombing attacks.

**Reference:**

- Dr. Michael Foreman, CCTA Medical Response Workshop, Beaumont, Texas, 26 June 2018

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 6.7. Provide for Ambulance Access**

**Discussion:** Develop protocols to ensure paths remain open for ambulances. Discuss access issues with EMS/Fire Services as they occur. Ambulance access should be a high priority task of police and incident command, but may get overlooked. Factors to consider for facilitating access include:

- Initial parking of police vehicles
- Repositioning of police vehicles, which would be easier if the department uses universal car keys. Universal car keys have their pros and cons, but many department use them. Further research is needed on how to handle this with “chip” controlled vehicles
- Towing or pushing civilian vehicles out of the way

*Community Action Plan to a Complex Coordinated Terrorist Attack*

- Determining in pre-plans and purchase decisions whether ambulances and fire service vehicles can be driven over curbs. Educate fire and ambulance drivers as to what heights of curbs and off-road terrain are likely to be traversable
- Familiarization of police, fire and ambulance crews with street and parking lot geography
- Having a police vehicle lead ambulances up to triage areas
- Sending pictures or maps of the parking lots or street configuration in real time, using photos from helicopters, remotely piloted vehicles, or fixed wing aircraft
- Using pathfinder vehicles to show the path through congestions. Once one vehicle figures out how to get through the maze, the path can then be sent to other ambulances or vehicles using apps n smart phones or possibly via an email from the pathfinder to communications center for relaying to others

**Status:**

**Task 6.15. Mass Casualty Incident Plan for Each Medical Facility**

**Discussion:** Every medical facility must coordinate a Mass Casualty Incident (MCI) plan developed in collaboration with first responders in the community it serves, that takes in consideration lessons learned from previous mass casualty incidents and provides information and training on what to do during similar instances.

**Reference:**

- Dr. Michael Foreman, CCTA Medical Response Workshop, Beaumont, Texas, 26 June 2018

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 6.16. Plan for Walk-In Patients.**

**Discussion.** Experience from previous Active Shooter/Mass Casualty Incidents has shown that many of the wounded will not wait for ambulances but, with the assistance of family or friends, will drive to the nearest hospital for treatment.

*Community Action Plan to a Complex Coordinated Terrorist Attack*

This can exacerbate patient tracking and allocation of casualties based on planned capacities as “walk-ins” are not tracked by EMS. Hospitals must anticipate the influx of walk-ins, address security considerations, and the coordination needed to defer incoming patients to other medical facilities.

**Task 6.19. Address Medical Care En Route**

**Discussion:** It is important to emphasize that emergency medical care activities should not stop as a casualty is evacuated. The military’s experience demonstrates that continuation or escalation of these measures is critical in reducing mortality during prehospital care. While there is a need to understand how these military experiences in prehospital patient care can be leveraged to decrease morbidity (illness or injury) and mortality (death) in the civilian setting, the ability to translate the military’s findings related to on-site and en route care to the civilian setting has not been fully demonstrated.

## Organization

### **Task 6.27. Establish a Law Enforcement Medical Coordinator (LEMC) within the Incident Command Structure.**

**Discussion.** Establish a Law Enforcement Medical Coordinator (LEMC) within the Incident Command structure to coordinate and de-conflict EMS resources with law enforcement response to a large incident(s). Creating an LEMC position ensures proper allocation of both human and medical assets. The LEMC would oversee resource need and distribution among operational teams. The LEMC ensures proper allotment of resources regardless of the duration of operations. The use of the LEMC allows the SWAT medic to focus solely on providing emergency aid within the hot zone, knowing that the coordination is being managed by a professional who understands the scene, its evolution, and their needs. Ideally this position would be filled by an active or former tactical medical provider – preferably a physician with knowledge of both the tactical and EMS functions. The LEMC provides the commander with critical information that may be overlooked by the traditional medical branch of the ICS. The LEMC will possess the ability to conduct an in-depth medical threat assessment using operational data gathered by law enforcement. The LEMC provides a conduit to both EMS and fire assets as well as providing operational input to the incident commander.

**Status:**

**Task 6.41. Re-emphasize Treatment of Blast Injuries in Medical Training.**

**Discussion.** Medical directors and medical assets should update their educational / professional development programs to re-emphasize treatment of blast versus ballistic injury.

**References.**

- Bobko, J., Sinha, M., Chen, D., Patterson, S., Baldrige, T., Eby, M., Lichtman, O. (2018). *A Tactical Medicine After-action Report of the San Bernardino Terrorist Incident*. *Western Journal of Emergency Medicine*, 19(2), 292. doi:10.5811/westjem.2017.10.31374

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 6.42. Provide Training to Clinical Care Providers on the Recognition and Management of Blast Injuries.**

**Discussion.** Hospital and clinic staffs can provide law enforcement and intelligence entities with critical information by recognizing and reporting blast injuries. In the absence of military grade explosives and dynamite, some terrorists will seek to manufacture and test explosives before their use on intended targets. Injuries sustained from blasts may lead investigators to discern terrorist threats and prevent future attacks.

**References.**

- *JCTAWS\* Observations in Homeland Preparedness for a Complex, Coordinated Terrorist Attack*

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 6.43. Train Hospital Staffs on Unique Aspects of Bombing Victims.**

**Discussion.** Leverage military and international experience with blast injuries to save lives. Many physicians and hospital personnel who have served in war zones over the last two decades have been exposed to bombing victims and effective techniques to ensure the survival of casualties in their care.

**References.**

- *JCTAWS\* Observations in Homeland Preparedness for a Complex, Coordinated Terrorist Attack*

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 6.44. Provide Medical Facility Staff Training in IED Awareness.**

**Discussion.** Medical facility personnel must be trained on how to scan for IED's and VBIEDs when entering a mass casualty incident in order to prevent further harm/deaths. This training should also increase the awareness of medical facility staff to IEDs and VBIEDs that might be placed at or in proximity to a hospital or medical facility. Hospitals should ensure that all staff members understand their hospitals protocols and procedures, as well as their individual roles and responsibilities during a bomb threat or discovery of a suspicious package. Hospitals should regularly exercise these procedures with local police and fire departments.

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 6.59. Establish a Multidisciplinary Team to Respond to Threats and Other Dangerous Behaviors**

**Discussion:** Many of the reports recommended that schools establish a multidisciplinary team, most commonly referred to as the Threat Assessment Team (TAT). This is a standing group whose purpose is to receive and assess all reports of threats and other alarming behaviors by any student or employee of the college or university. If it determines that a threat to self or others exists, the TAT plans a course of action for managing the case and continues to implement this plan over time until it is determined that the threat no longer exists. The TAT should consist of representatives from the administration, law enforcement, medical department, mental health, faculty, student services, legal counsel, and human resources functions.

## VII. INTELLIGENCE

---

### **Risk Analysis - Target Identification**

#### **Task 7.1. Create a List of Possible Iconic Targets in the Jurisdiction**

**Discussion.** Assemble/maintain a list of possible high profile, “soft targets” in the jurisdiction. Past history has shown the determination of terrorists to seek high body counts, go after iconic targets, and cause economic damage. Since attacks against soft targets are relatively easy and cheap to mount, such institutions will remain targets of future attacks. Typical targeted locations were:

- Public spaces
- Placed where many people were coming or going
- Places with limited ingress and egress points
- Places with high-density crowds

**References.**

- *Mumbai AAR*, (page 21)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

#### **Task 7.2. Maintain a Prioritized List of Critical Infrastructure in the Region**

**Discussion.** Identify critical infrastructure that may be targeted in a Complex Coordinated Terrorist Attack. Consider the estimated impacts and possible cascading effects that damage to or loss of such critical infrastructure would have on the surrounding community and region.

**References.**

- SETRPC CCTA Intelligence Workshop, Beaumont, Texas, July 2018.

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

#### **Task 7.3. Maintain a Contact List for Community Leaders in the Region**

**Discussion.** In the event that attackers seek to disrupt government by targeting public officials, a contact list of community leaders that include both their home and work addresses can help provide timely warnings and greatly reduce response times. In past instances of Complex Coordinated Terrorists Attacks, attackers have targeted specific individuals or groups of individuals. Specific targeting of an individual may not be particularly telling, but it normally indicates a high degree of planning by attackers.

**References.**

- SETRPC CCTA Intelligence Workshop, Beaumont, Texas, July 2018.

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

*Community Action Plan to a Complex Coordinated Terrorist Attack*

**Task 7.4. Conduct “Walk Throughs” of Key Facilities by First Responders**

**Discussion.** Periodically conduct “walk throughs” of key facilities to include malls, schools, churches, and sports venues, to thoroughly familiarize first responders with each facility’s entry and access points, floor plan, passageways, location of power sources, control centers, internal communications and CCTC coverage.

**References.**

- SETRPC CCTA Tactical Response Workshop, June 2018.

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Community Outreach**

**Task 7.5. Educate the Public to Recognize and Report Terrorist Activity**

**Discussion.** Develop outreach materials to educate the public on recognizing and reporting behaviors and incidents that point toward terrorism or other criminal activity. Existing SAR awareness training programs, such as NSI’s Hometown Security Partners training programs available at [http://nsi.ncirc.gov/training\\_online.aspx](http://nsi.ncirc.gov/training_online.aspx) can be used to educate those partner with missions similar to law enforcement.

**References.**

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 7.6. Promote the “See Something, Say Something®” Campaign**

**Discussion.** Conduct a Public Awareness Campaign about detecting and appropriately addressing indicators of potential multiple casualty violence focused on

- Increase trust between law enforcement and the general public
- Reduce individual’s reluctance to come forward
- Dismiss the notion that “minding one’s own business is acceptable and instill a sense of moral obligation to protect fellow community members
- Direct people to available resources – who to contact, how to contact (advertise the DHS tip line and other various modalities such as telephone, Internet, telephone and texting).

Community Action Plan to a Complex Coordinated Terrorist Attack

**Task 7.7. Recruit Community Partners to the “See Something, Say Something®” Campaign**

**Discussion.** The "If You See Something, Say Something®" campaign forms partnerships to help reach the public across the nation. Our partners increase awareness by displaying the campaign's messages and distributing outreach materials, including Public Service Announcements (PSAs).

Partners include, but are not limited to:

- States, cities, and counties
- Airports and mass transit entities
- Sports leagues and teams
- Major sports events and entertainment venues
- Colleges and universities
- Fairs and festivals
- Private sector businesses
- Media outlets

- <https://www.dhs.gov/see-something-say-something/become-partner>

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 7.8. Create Statute to Limit Liability for Citizens Reporting Indicators of Potentially Violent Behavior**

**Discussion.** Draft a model statute providing limited liability for citizens who report indicators of potentially violent behavior.

**Reference.**

- *Strategic Approaches to Information Sharing*, U.S. Department of Justice, Office of Community Oriented Policing Services, (2013) (page 13, Recommendation 8)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 7.9. Promote Volunteers in Police Service (VIPS) Program**

**Discussion.** In order to increase the outreach of intelligence and law enforcement capacity during times of emergencies, jurisdictions should promote the VIPS Program in their communities. Volunteers in Police Service is a locally-driven Citizen Corps program that allows community members to offer their time and talents to their local law enforcement agency. The Volunteers in Police encourages individuals to provide support local police departments and sheriff’s offices. Volunteers in Police Service serves both a volunteer's desire to serve as well as a law enforcement agency's need for support.

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

*Community Action Plan to a Complex Coordinated Terrorist Attack*

**Task 7.10. Expand Upon the Local Neighborhood Watch Program.**

**Discussion.** The Neighborhood Watch Program is an element of the Citizens' Corps that focuses on crime prevention in the community. The National Neighborhood Watch Program unites law enforcement agencies, private organizations, and individual citizens in a nation-wide effort to reduce crime and improve local communities. The Neighborhood Watch program empowers citizens to become active in community efforts through participation in Neighborhood Watch groups. This existing program can be expanded upon to increase awareness of terrorism and terrorist activities –and also address helping those disabled or in need of assistance in the aftermath of a tragedy/disaster.

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 7.12. Promote InfraGard Among Businesses in the Jurisdiction.**

**Discussion.** InfraGard is a non-profit organization serving as a public-private partnership between U.S. businesses and the Federal Bureau of Investigation. The organization is an information sharing and analysis effort serving the interests, and combining the knowledge base of, a wide range of private sector and government members. InfraGard is an association of individuals that facilitates information sharing and intelligence between businesses, academic institutions, state and local law enforcement agencies, and other participants dedicated to prevent hostile acts against the United States. InfraGard's mutual nondisclosure agreements among its members and the FBI promotes trusted discussions of vulnerabilities and solutions that companies and individuals may be hesitant to place in the public domain and provide access to additional threat information from the FBI.

Community Action Plan to a Complex Coordinated Terrorist Attack

**Task 7.13. Promote the Bomb Making Materials Awareness Program**

**Discussion.** The Bomb-Making Materials Awareness Program (BMAP) is a national outreach program, sponsored by the Department of Homeland Security (DHS) in partnership with the Federal Bureau of Investigation, designed to increase public and private sector awareness of the use of homemade explosive (HME) precursor chemicals, explosive powders, and improvised explosive device (IED) components. Through increased awareness, BMAP builds a network of vigilant and informed private sector partners who serve as the Nation’s counter-IED “eyes-and-ears” as the first line of defense in providing early detection of the sale of HME precursor chemicals to suspect individuals. Program Description BMAP provides the training, tools, and resources that help local first responders and other community outreach officers engage a wide range of private sector establishments within their jurisdictions that manufacture, distribute, or sell products that contain HME precursor chemicals or explosive powders. Participants who attend the BMAP training become BMAP Outreach Officers who reach out to local businesses in their jurisdictions to help employees identify relevant HME precursor chemicals, explosive powders, potential critical IED components, suspicious purchasing behavior, and proper reporting procedures. The program simultaneously encourages stronger relationships between businesses and local law enforcement, and reinforces the foundation of effective community safety and security. This program serves to:

- Enhance public/private partnerships
- Increase private sector point-of-sale awareness
- Increase identification of suspicious purchasing behavior and reporting
- Promote community-based policing
- Provide free, secure access to training and awareness materials
- Provide reporting mechanisms to track and measure success
- Strengthens prevention opportunities

**References.**

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 7.14. Train Terrorism (Threat) Liaison Officers**

**Discussion.** Consider instituting a Terrorism Liaison Officer (TLO) program, whereby TLOs are trained to be their agency’s representative at the fusion center and can relay terrorism threat information to public safety officials.

**References.**

- National Counterterrorism Center, *JCTAWS Observations in Homeland Preparedness for a Complex Coordinated Terrorist Attack*, (page 1)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

*Community Action Plan to a Complex Coordinated Terrorist Attack*

**Task 7.15. Train Select Volunteers as Infrastructure Liaison Officers.**

**Discussion.** Texas seeks to build a robust statewide network of public and private sector volunteers helping Texas law enforcement reduce vulnerabilities to critical infrastructure. The Texas Joint Crime Information Center's Infrastructure Liaison Officer (ILO) program is a network of trusted citizen volunteers or law enforcement officers recruited and trained to help Texas protect its infrastructure from crime, sabotage, and terrorism. ILOs are partners of the state's primary fusion center, the JCIC, which house a diversity of local, state and federal law enforcement agencies working together under one roof. ILOs are trained to see and report suspicious activities. In turn, the JCIC can use the reporting to create investigative leads and awareness to guard against threats.

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Situational Awareness**

**Task 7.18. Construct Synchronization Matrix for Intelligence Response**

**Discussion.** Provide detectives, investigators, and intelligence analysts with a synchronization matrix listing key tasks to be accomplished aligned with phases of response to a Complex Coordinated Terrorist Attack. This matrix is graphic representation of planned actions aligned to time and/or events. It facilitates the integration of planning and resources and manages the alignment of available capabilities to each task. The synchronization matrix: provides a quick aid to decision making; shortens reaction times; acts as a blueprint for response to a variety of contingencies; provides continuity to staff and decision makers in the absence of key personnel; and lessens the impact of stress and sleep deprivation by providing a previously determined series of actions.

*Community Action Plan to a Complex Coordinated Terrorist Attack*

**Task 7.41. Dispatch/911 Training – Intelligence Gathering**

**Discussion.** Ensure that Dispatch and 911 personnel are trained and provided reference checklists to assist in ASI and intelligence gathering. Ensure that they are trained to be able to provide and explain recommended actions for evacuation, shelter in place, etc.

**Reference.**

- “*Active Attack Training for Dispatchers and Keeping the Lost Alive.*” Wayne Freeman, South Carolina Law Enforcement at the 2018 ALERRT Symposium, Grapevine, Texas, November 2018.

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status**

**Task 7.42. Dispatch/911 Training - Fire Arms Recognition**

**Discussion.** Allow Dispatchers to listen to the sounds of firearms training conducted by law enforcement agencies in their region so as to better recognize the sounds of gunfire, types of weapons being used that may be heard over the telephone in 9-1-1 emergency calls.

**References.**

- “*Active Attack Training for Dispatchers and Keeping the Lost Alive.*” Wayne Freeman, South Carolina Law Enforcement at the 2018 ALERRT Symposium, Grapevine, Texas, November 2018.

**Responsibility:**

**Assisted by:**

**Target Date:**

**SAR/Intelligence/Tips Hotline**

**Task 7.43. Create Mechanisms to Report Indicators of Potentially Violent Behavior**

**Discussion.** Use technology to create mechanisms that allow individuals to anonymously report indicators of potentially violent behavior. This might be a standard Intelligence and Tips Hotline or an online platform for submission of Suspicious Activity Reports. Forward this information to the Houston Regional Intelligence Services Center for analysis and possible action.

**References.**

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

*Community Action Plan to a Complex Coordinated Terrorist Attack*

**Task 7.44. Create Intelligence/Tips Hotline**

**Discussion.** Contract, lease, or obtain access to a toll-free number to be able to immediately establish an Intelligence/Tips Hotline for Suspicious Activity Reporting specific to an incident. It may be possible to coordinate this hotline with the Fusion Center servicing that region. Assign a law enforcement detective to this hotline to answer questions from call takers and to review information received for timely action.

**Task 7.49. Public Works Officials Map Subterranean Passageways/Sewers/Waterways with Intersections, Access and Entry Points.**

**Discussion:** In the effort to identify, isolate and contain suspected terrorists, Incident Commanders and Intelligence assets must be able to identify, monitor, and close off possible avenues of access/escape offered by subterranean passageways. The jurisdiction, working in concert with private sector entities, should assemble a concise mapping of subterranean tunnels, waterways, sewers, and utility passages, with possible entry and access points. This information should be made readily available to the Incident Commander and ICS General Staff (Intelligence and Operations) during an emergency situations.

***Technology and Equipment***

**Task 7.50. Access to Private Facilities CCTV Cameras/Footage**

**Discussion:** Coordinate with business leaders and facility owners to provide local law enforcement agencies access to private facilities security cameras/footage Intelligence and information sharing typically continue to be a problem among public and private sector entities within a metropolitan area. Arrangements should be made to provide law enforcement access to private facilities security cameras/footage during a crisis. Ideally, continuous access by law enforcement officers to real-time camera footage will significantly assist law enforcement response to a terrorist threat and criminal activities.

- Joint Counterterrorism Assessment Team, *Intelligence Guide for First Responders*, <https://hsin.dhs.gov>, (page 15)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 7.60. Leverage Fusion Centers to Enhance Intelligence Outreach**

**Discussion.** Leverage fusion centers to develop or enhance outreach opportunities to private sector officials and community volunteer organizations (e.g., Nationwide Suspicious Activity Reporting Initiative).

**References.**

- National Counterterrorism Center, *JCTAWS Observations in Homeland Preparedness for a Complex Coordinated Terrorist Attack*, (page 1)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 7.61. Conduct Ongoing Coordination with Fusion Center(s)**

**Discussion.** Conduct periodic meetings between law enforcement and fire marshals and officials/analysts from the servicing Fusion Center to discuss information requirements and promote the accessibility of threat-related products. Discussion should seek to address any challenges to information sharing between local and state agencies, the Fusion Center, and non-government entities.

**References.**

- National Counterterrorism Center, *JCTAWS Observations in Homeland Preparedness for a Complex Coordinated Terrorist Attack*, (page 1)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 7.62. Develop Formal Procedures to Share Threat Information Between the Fusion Center and Public Safety Organizations.**

**Discussion.** Determine and test best communication methods. Consider use of such existing systems as:

- Homeland Security Information Network
- FBI's Law Enforcement Enterprise Portal (LEEP)
- Regional Intelligence Sharing Systems (RISS)
- Law Enforcement Online (LEO)
- eGuardian
- Virtual Command Center (VCC)

Provide a direct line from Incident Command (Area Command) to the Fusion Center. Consider deployment of an Intelligence Strike Team/Task Force with internal communications capabilities.

**References.**

- National Counterterrorism Center, *JCTAWS Observations in Homeland Preparedness for a Complex Coordinated Terrorist Attack*, (page 1)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

*Community Action Plan to a Complex Coordinated Terrorist Attack*

**Task 7.63. Create Critical Information Requirements for Terrorist Attacks**

**Discussion.** In coordination with law enforcement and fire investigators and servicing fusion center(s), develop a set of questions to focus responders' attention and subsequent reports so as to help garner key information early in the attack. This typically includes detailed queries as to:

- Number of attackers
- Attire
- Body Armor
- Weapons
- Behavior/Aggressiveness
- Declarative Statements
- Remote Command and Control

## VIII. OPERATIONAL COMMUNICATIONS

---

### Plans, Policy, and Procedures

#### Task 8.1. Goal for Operational Communications.

**Discussion:** Have a clear idea of an effective communications system. Ensure the capacity to communicate with both the emergency response community and the affected populations and establish interoperable voice and data communications between local, state, tribal, territorial, and Federal first responders. Re-establish sufficient communications infrastructure within the affected areas to support ongoing life-sustaining activities, provide basic human needs, and transition to recovery.

**References:**

- *National Response Framework*, (page 23)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

#### Task 8.2. Ensure Familiarity with the National Communications System.

**Discussion:** The DHS/National Communications system coordinates the reestablishment of the critical communications infrastructure, facilitates the stabilization of systems and applications from cyber-attacks, and coordinates communications support to response efforts. Functions include but are not limited to: coordination with telecommunications and information technology industries, reestablishment and repair of telecommunications infrastructure, protection, reestablishment, and sustainment of national cyber and information technology resources, oversight of communications within the Federal response structures.

**References:**

- *National Response Framework*, (page 32)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

#### Task 8.3. Establish Plans For A Joint Threat Assessment.

**Discussion:** The purpose of the joint threat assessment is to determine the likelihood of an intentional incident and identify response actions that should be performed by law enforcement and public health. It is recommended that the joint threat assessment be conducted by a conference call and, at a minimum, include the following representatives: Law enforcement (trained in WMD response), Public health (epidemiologist, clinician, laboratorian), Communications (law enforcement and public health). The agenda of the conference call may include: incident briefing by public health, explanation of concern by public health, update on confirmed or suspected cases, demographic information: gender, age, race, ethnicity, occupation, religious affiliation, membership in any groups or associations, description of where patient lives

*Community Action Plan to a Complex Coordinated Terrorist Attack*

(e.g., urban, rural), patient’s recent travel history (e.g., domestic or international), recent activities that may be related to exposure and illness, current laboratory test results, hypotheses regarding source of exposure, syndromic surveillance: any unusual patterns of disease presentation or geographical clustering of disease. Law enforcement information / intelligence: information on existing threats in the jurisdiction (WMD or otherwise), WMD intelligence that may be connected to patient’s exposure (e.g., religious affiliation, group, association), intelligence regarding acquisition or intended use of any biological threat agent, which may be related to the patient’s symptoms.

**References:**

- *Joint Criminal and Epidemiological Investigations Handbook*, FBI/CDC, (page 54)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 8.4. Develop A Multi-Agency Communications Plan**

**Discussion:** Develop a multi-agency communication plan that can be implemented on short notice, including schools and business. The communication plan should include contingency plans in the event networks are inaccessible. The plan should establish a common language upon prior to an event among responding agencies. All information released to the public about an event must be consistent across agencies and comes from a designated Public Information Officer, as specified in the plan. A survey of radio equipment and encryption type for each department and discipline should be conducted while completing the plan. All information should be set forth in a crisis manual which is used both in rehearsals and in actual events. A manual with a modular structure, such as a loose-leaf binder, can easily be updated and permits information to be tailored according to need. The manual should be available both as hard copy and electronically.

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

*Community Action Plan to a Complex Coordinated Terrorist Attack*

**Task 8.5. Establish a Two-Level Communications Plan**

**Discussion:** The plan should be able to be activated on short notice and should rapidly facilitate communications on two levels, the Incident Coordination Channel, and an On-scene Command Channel. The Incident Coordination Channel should be between the initial senior officer on-scene and the city/county dispatch center or appropriate entity coordinating the operational response. A dedicated incident coordination channel with dispatch is needed to ensure a single dispatcher is not overwhelmed and to ensure the on-scene commander has direct and uninterrupted communications with the dispatch to facilitate information follow and the requests for resources.

**References:**

- *Unified Response Framework: Multidiscipline Response to a Complex Terrorist Attack*, (page A-1)
- *First Responder's Toolbox*, National Counter Terrorism Center.

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 8.6. Develop Continuity Plans To Mitigate Cellular Degradation.**

**Discussion:** Cellular systems typically become severely overwhelmed during the incident, severely impacting communications and response. The region/jurisdiction should develop communications continuity plans using a diverse set of tools, systems, and applications to mitigate cellular degradation. Include GETS, WPS, Satellite telephones, and non-traditional communications methods.

**References:**

**Status:**

**Task 8.14. Assist Businesses in Developing Emergency Communication Plans.**

*Community Action Plan to a Complex Coordinated Terrorist Attack*

**Discussion:** Critical infrastructure, such as privately-owned transportation and transit, telecommunications, utilities, financial institutions, hospitals, and other health regulated facilities should have effective business continuity plans. Put in place communications infrastructure that allows for facility-wide, real-time messaging. Put in place elevator systems that may be controlled or locked down from a central command station. The population at any given time is likely to be highly diverse and include children and foreign passengers with limited English proficiency complicating communication and evacuation efforts. Establish a notification plan for these passengers, and a plan for surrounding businesses.

**Dispatch Center**

**Task 8.15. Recognize the Important Role of Dispatchers.**

**Discussion.** Dispatchers are generally the first contact of the responder community to become engaged in an Active Shooter/Hostile Event and thus must become part of a seamless response.

- a. Rotate law enforcement, fire and EMS personnel through dispatch training
- b. Create a “Dispatch 101” and field training educational program
- c. Rotate cross-training assignments (have fire/EMS personnel teach law enforcement and vice versa)
- d. Integrate dispatch into all aspects of training and exercise scenarios
- e. Training and exercises should include victim simulations and training on recognizing the type of incident (the difference between shots fired and an active shooter)

**Status:**

**Task 8.21. Lease a 1-800 Number(s) for Large Incidents**

**Discussion.** Historically, 9-1-1/Dispatch is deluged with telephone calls seeking incident information or attempting to provide information to law enforcement investigators. In the immediate aftermath of mass fatality incidents, there is typically a need to establish call in telephone numbers for intelligence and tips to solicit information from the public in order to prevent further attacks and loss of life; a Missing Persons Hotline; and a toll-free telephone number to the Family Assistance Center for those family members who are unable to travel to the region. A common and proven method to take pressure off 9-1-1 and free up Dispatchers to focus on emergency mission, is to activate a 1-800 number for the incident. The telephone number should be leased in advance in order to preclude delays and facilitate immediate activation.

**Note:** 211 has been used by some regions to provide a call-in number.

**Responsibility:**  
**Target Date:**

**Assisted by:**  
**Status:**

**Task 8.22. Improve Dispatch Intelligence Collection**

**Discussion:** Ensure the dispatch obtains answers to the questions: who or what they saw, when they saw it, where it occurred, and why it is suspicious. Active shooter calls should contain information regarding the location of the active shooter, number of shooters, physical description of shooters, number and type of weapons held by shooters, number of potential victims at the location. Ensure follow-ups are conducted with callers to update incident command. Establish guideline for call backs specifically, when to call, who to call, what text to use to convey a sense of emergency, and how acknowledgement is to be obtained from the person. Dispatchers should ensure that all pertinent information received during an emergency call is documented in the dispatch notes in addition to be broadcast over the radio, even after initial officers arrive on scene. Social media can be used to provide actionable information from institutions and can be a reliable source for the public.

**Status:**

**Task 8.23. Provide Dispatch the Ability To Receive Text/Picture Messages.**

**Discussion:** Dispatchers have used smartphones to receive critical information from callers during times of high congestion and communications failures. Voice, email, text, picture, video messages can all be used to receive and transmit emergency information. "Work-arounds," such as the use of smartphones, must be prepared to be utilized in the event of a communications failure.

**Status:**

**Organization**

**Task 8.25. Create Interagency Liaison Officer (ILO) Positions**

**Discussion.** Create ILO positions in stationary places such as dispatch, and command centers. In the United Kingdom, ILOs have been used successfully to coordinate communications between the incident commander and law enforcement and fire/EMS responders. They help translate terminology and address gaps in interdisciplinary knowledge and understanding. The ILO is similar in concept to a safety and intelligence officer. Note that the ILO is not considered a substitute for unified or coordinated command in warm zone operations.

### Task 8.39. Pre-Program Regional Channels on Agency Radios.

**Discussion:** Pre-program radios with the specified regional channels used for communicating across jurisdictional disciplines and agencies. Identify channels used for:

- Command
- Tactical Response
- Medical Response
- Investigations/Intelligence (encrypted)

If there is enough room in your radio, program all channels as analog and again as digital channels. If not, program as follows: Incident Response channels – all analog, Law Enforcement channels – program all as P25 digital with NAC \$68F (1 6 7 9 1 0) except LE A, LE 1, LE B, LE10, and LE 16 which are to be programmed analog with Tx CTCSS 167.9 Hz (6Z) and no Rx CTCSS (carrier squelch, CSQ). If your radio has a user-selectable option to enable/disable CTCSS on receive, you may choose to configure this option so that the user can enable the same CTCSS tone used on transmit for receive. The default configuration should be CSQ receive. Note on using the Federal Interoperability Channels: These channels may not be used for state/state, state/local, or local/local interoperability. A Federal entity must be involved when these are used.

*Community Action Plan to a Complex Coordinated Terrorist Attack*

**Status:**

**Public Response**

**Task 8.46. Identify Ways To Unify Public Response Across Agencies.**

**Discussion:** Roles, responsibilities, information flows and reporting lines which are to be followed in the event of a crisis should be established in advance. This is not only important to ensure that crisis management runs smoothly, but also plays a role in public perception. The public does not distinguish between individual official bodies and institutions, but views them as a whole and as representatives of the democratic system. The consequences of contradictory statements or uncoordinated actions can thus be damaging; they not only undermine the credibility of the players, but also extend the negative impact of a terrorist attack.

**References:**

- *SAFE-COMMS Terrorism Crisis Communication Manual for Public Authorities*, (page 49)

**Responsibility:**  
**Target Date:**

**Assisted by:**  
**Status:**

**Task 8.47. Develop A Plan To Communicate Road Closures.**

**Discussion:** Establishing and maintaining open lines of communication between all agencies involved will likely increase the effectiveness of information sharing and logistical coordination efforts such as the effect of road closures on emergency response routes.

## IX. VICTIM AND FAMILY SERVICES

---

### Lead Agencies

#### Task 9.1. Assess Jurisdictional Readiness

**Discussion:** Pre-determine who in your jurisdiction has necessary qualifications and training for victim and family support. Individuals involved in directly providing information, support, and services to victims and families during these disaster events must be carefully selected and trained. These providers may be FBI Victim Specialists, air carrier family assistance team members, or local community social service providers. The highly stressful and emotionally challenging environment necessitates the individuals have the requisite skills and temperament to operate effectively.

**References:**

- *FBI Mass Fatality Incident Family Assistance Operations: Recommended Strategies for Local and State Agencies*, (page 8)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

#### Task 9.2. Determine Lead Victim Services Agency

**Discussion:** Create plans to determine which local agency is the lead agency for human services needs in the aftermath of a disaster. Determining who the local lead agency is can be a challenge as there may be a large local jurisdiction that is made up of many small cities. This designated agency will also serve as the lead agency in establishing a Family Assistance Center.

**References:**

- *Broome County, NY, Shooting AAR*, (Area 9)
- *Washington Navy Yard AAR*, (page 78)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

#### Task 9.3. Designate Lead Forensic Identification Agency

**Discussion:** Determine the agency responsible for forensic identification. Generally, the local medical examiner or coroner is responsible for victim identification. However, if the incident involved a federal facility, the Office of the Armed Forces Medical Examiner may be designated by the US Attorney General. If a Presidential disaster declaration has been issued, a Federal Disaster Mortuary Operational Response Team (DMORT) may support the local jurisdiction in accordance with the Stafford Act or by request of another federal agency.

*Community Action Plan to a Complex Coordinated Terrorist Attack*

**References:**

- *FBI Mass Fatality Incident Family Assistance Operations: Recommended Strategies for Local and State Agencies*, (page 11)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 9.4. Determine Lead Agency for Death Notifications.**

**Discussion:** Ensure relevant jurisdictions are clear on who shall be conducting the death notifications (Medical Examiner vs. Law Enforcement). Death notifications should be done in teams that include a victim services provider. It may also be prudent to allow an EMT to accompany the notification team (remaining outside the residence) for in-person notifications in case the family member has a physiological reaction to the notification.

### Task 9.11. Agree on Services Provided at the Family Assistance Center

**Discussion:** Consider provisions for victim and witness care while they are awaiting interviews and families are being notified. A number of processes, procedures, and assets must be put in place in order to ensure an effective and secure FAC. The following is a recommended, but not exhaustive, list:

- Security of FAC facility
- Check in/out point for families and survivors
- Identification badges and security procedures
- Communications Equipment (computers, phones, audio-visual, public address system)
- Child Care
- Access to emergency medical care
- Crisis intervention specialists
- Access to clergy
- Financial services
- Travel assistance
- Local transportation
- Meals
- Clothing and toiletries

**Task 9.19. Develop and maintain a list of trained Advocates for the Family Assistance Center**

**Discussion.** Establish training requirements for Advocates at the Family Assistance Center. Establish a vetted network of licensed mental health professionals in the local area. Maintain a list of those agencies and

**References.**

- *Las Vegas AAR*, (page 47)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 9.20. Maintain consistency in the assignment of Advocates**

**Discussion.** Once a family advocate is assigned to a victim or family, it is best not to change or reassign that advocate, even if another advocate needs to be added per legal protocols. Of course, an exception would be removal if requested by the victim or family. A key aspect of the assistance is providing someone that the family can regard as a trusted advocate.

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 9.21. Designate Victim Advocate POCs for Hospitals**

**Discussion:** There should be a lead advocate assigned to each hospital that receives victims to coordinate all victim advocates responding to that location. Hospitals should include a point of contact in their mass casualty plans who work with that victim advocate coordinator. As a team, they would be in position to handle requests for information on the status of the injuries, help family members to be with their loved ones and coordinate information with the family reunification center.

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 9.22. Pre-Determine Points of Contact for Federal Support**

**Discussion:** Plans/annexes for Victims and Family Services should include pre-identified points of contact to work with and support family members (e.g. Federal victim assistance personnel counselors, police officers). Plans should also

*Community Action Plan to a Complex Coordinated Terrorist Attack*

include the process used to request such support. These points of contact should be connected to families as early in the process as possible, including while an individual is still missing but before any victims have been positively identified.

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 9.23. Request FBI Victim Assistance Specialists**

**Discussion:** Determine if the jurisdiction in which the incident occurred is equipped to handle the complex victim/ family response. If not, determine the appropriate method to involve the FBI's Victim Assistance Specialists into the incident response to assist with notifications and other support for family members.

**References:**

- *Planning and Response to an Active Shooter*, Appendix A

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 9.24. Cell Phone Charging Stations**

**Discussion.** Coordinate with local hotels to obtain those telephone chargers left behind by guests. To create a low cost cell phone charging station, arrange the chargers in mixed groups; fasten them with quick ties, and connect them to electrical outlet extension strips. These charging stations can then be made available for use by Family Assistance Center patrons.

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 9.25. Determine Victim Personal Effects Management**

**Discussion:** Create a system for the processing of victims' personal effects. Personal effects are generally classified as associated if they are in direct contact with the victims' remains (e.g. ring on a finger, shoes worn), associated with the victim's name but not remains (e.g. luggage with baggage tag, wallet with driver's license), and unassociated if there is no easily discernible link to an individual victim. Typically, the process of handling personal effects involves the following:

- Explain personal effects management process to family members
- Documentation and recovery from the site or from remains, including initiating chain of custody
- Decontamination and preservation
- Inventory and catalogue

**FOR OFFICIAL USE ONLY**

*Community Action Plan to a Complex Coordinated Terrorist Attack*

- Provide family members with associated and unassociated catalogues and instructions to claim or disassociate items
- Return associated items per family instructions
- Retain unassociated items and ultimately destroy after notifying families of intentions

**References:**

- *FBI Mass Fatality Incident Family Assistance Operations: Recommended Strategies for Local and State Agencies*, (page 12)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 9.26. Create Printed Materials**

**Discussion:** In preparation for a potential incident, consider printing age-appropriate resources to help families recognize and seek help with regard to a wide variety of reactions that they or their loved ones can experience during and after an emergency.

**References:**

- *Planning and Response to an Active Shooter: An Interagency Security Committee Policy and Best Practice Guide*, (page 16)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 9.27. Implement Staggered Leave**

**Discussion:** Victim services agencies should consider scheduling leave so that there are not too many advocates on leave at the same time. A phone tree with assigned team leads to facilitate the process of callbacks should be considered as well.

**References:**

- *Aurora AAR*, (page 136)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Virtual Family Assistance Center**

**Task 9.28. Create a web page for the Virtual Family Assistance Center**

**Discussion.** To supplement the efforts of call center operators, create and activate a web page that incorporates the following features and information:

- Telephone number to Virtual Family Assistance Center
- Link to incident web page
- Access to forms to capture and submit ante mortem data
- Link to the American Red Cross [www.safeandwell.org](http://www.safeandwell.org) web site
- Links to nation-wide mental health support services
- Links to victim support services (i.e., FBI Victim Services Division, American Red Cross, various state law enforcement victim services)
-

*Community Action Plan to a Complex Coordinated Terrorist Attack*

- Names (and memorial photos?) of known victims (only posted following confirmation/notification of family members)
- Information on such topics as:
  - Stress and grief coping mechanisms
  - Spiritual and behavioral health support services
  - Death Certificate information
  - Social Security: access to death and disability benefits
  - Legal Assistance: information on insurance benefits and death-related concerns
  - Financial Assistance: resources and application/referral process
  - Public Health concerns
  - Information regarding keeping the decedent in the home (if the body cannot immediately be removed)

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Task 9.29. Establish Service Provision Hotline (SPH)**

**Discussion:** An SPH may be established to provide mental health support, logistic support, emergency assistance services, legal services, and information about scheduled briefings at the FAC. It complements efforts to establish a Virtual Family Assistance Center. The SPH may sometimes evolve from the MPCC after the victim identification process has concluded. Depending on scope and number of victims, the SPH may be physically part of the FAC. The hotline has the added benefit of providing information to family who cannot be physically present at the FAC.

**Responsibility:**

**Assisted by:**

**Target Date:**

**Status:**

**Missing Persons**

**Task 9.30. Establish a Missing Persons Call Center**

**Discussion:** Acquire a toll free number to be used as a Missing Persons Call Center (MPCC). In the immediate aftermath of a MCI, the toll free number should direct callers to an existing website until such a time as a call center can be staffed to receive the calls. The objectives of the MPCC are to collect basic information about the person reported missing, contact information for the reporter/informant, and information that will be used by law enforcement to assess the likelihood of involvement allowing for investigative prioritization.

*Community Action Plan to a Complex Coordinated Terrorist Attack*

Establishing a hotline dedicated to missing persons can help to expedite the identification process.

*Community Action Plan to a Complex Coordinated Terrorist Attack*

**Task 9.36. Notification of Next-of-Kin**

**Discussion:** Before an emergency, the planning team must determine how, when, and by whom family members (next-of-kin) will be informed if their loved one is missing or has been injured or killed. This is an extremely difficult and emotional task that requires understanding, compassion, candor and strength. Whenever possible, notifications should be made in person. In mass casualty events, notifications should be made in a timely manner to lessen the stress on family members or significant others as they await notification of the status of the missing.

## Donations

### Task 9.39. Develop a Plan to Manage Donations

**Discussion:** In advance of any emergency, develop a community plan to manage, receive, and distribute the large amounts of donations likely to flow in to help victims. It is recommended that the jurisdiction identify a non-profit agency with the capabilities to track all donations and disbursements. It is important that this agency maintain detailed accountability to ensure all donations are provided to survivors, victims' families, and in some aspects, first responders. One approach is to quickly establish a "One Fund" into which all unrestricted financial donations are channeled. Other types of donations, for example airline tickets for victims and families, can be accommodated separately.

## Public Information

### Task 9.40. Create Public Messages Regarding Victim and Family Services.

**Discussion.** Write "fill in the blank" messages in both English and Spanish (and other languages per regional demographics), formatted both for press release, SMS text, Twitter, and Facebook. These messages should include:

- Opening of the Family Assistance Center
- Establishment of the Missing Persons Hotline
- Virtual Family Assistance Center
- Memorial Service
- Transition to Long-Term Care

Coordinate these messages with the jurisdiction's Public Information Officer.

## X. TRAINING

---

Listed below are training resources that contribute to increased readiness for a Complex Coordinated Terrorist Attack and Active Shooter Incidents:

### **Advanced Law Enforcement Rapid Response Training (ALERRT)**

**Course: Terrorism Response Tactics: Active Shooter Level I**

**Target Audience:** Law Enforcement

**Course Provider:** ALERRT Center, Texas State University

**Course Length:** 16.0 hours

**Course Delivery:** Instructor led

**Course Description:** This course is designed to prepare the first responder to isolate, distract, and neutralize an active shooter. The course curriculum includes weapons manipulation, threshold evaluation, concepts and principles of team movement (including solo officer strategies), setting up for room entry techniques, approach, and breaching the crisis site, follow-on responder tactics, improvised explosive devices (IEDs), and post-engagement priorities of work. The course will culminate with dynamic force-on-force scenarios.

**References:** <http://alerrt.org/Course-Catalog/Level1>

**Course: Terrorism Response Tactics: Active Shooter Level II**

**Target Audience:** Law Enforcement

**Course Provider:** ALERRT Center, Texas State University

**Course Length:** 16.0 hours

**Course Delivery:** Instructor led

**Course Description:** This course curriculum includes TECC-based self-aid and buddy-aid techniques including hemorrhage control and tourniquets, bandaging, airway management, triaging, casualty collection points, and casualty evacuation points, and casualty evacuation methods. The course includes force-on-force mass casualty scenarios where the student will not only have to neutralize the threat but also treat the wounded, establish casualty collection points, conduct hasty triage, and integrate responses with EMS and fire personnel.

**References:** <http://alerrt.org/Course-Catalog/Level2>

**Course: Terrorism Response Tactics: Exterior Response to Active Shooter Events (ERASE)**

**Target Audience:** First Responders

**Course Provider:** ALERRT Center, Texas State University

**Course Length:** 24.0 hours (3 days)

**Course Delivery:** Instructor led

**Course Description:** This course is designed to prepare first responders for an open-air active shooter encounter. It addresses a wide range of tactics and techniques when dealing with an exterior armed aggressor. This hands-on course will cover equipment selection, vehicle ambushes, medical emergencies,

*Community Action Plan to a Complex Coordinated Terrorist Attack*

mounted and dismounted officer- and citizen-down rescue, dismounted individual and team movement techniques, and emergency vehicle crisis response.

**References:** <http://alerrt.org/ofcm/CourseTypes/catalog/83>

**Federal Emergency Management Agency**

**Course: (ICS-300) Intermediate Incident Command System for Expanding Incidents**

**Target Audience:** First Responders

**Course Provider:** Emergency Management Institute (FEMA)

**Course Length:** 24.0 hours

**Course Delivery:** Instructor led

**Course Description:** This course provides training on and resources for personnel who require advanced application of the Incident Command System (ICS). The target audience includes all individuals who may assume a supervisory role in expanding incidents. This course expands upon information covered in IS 100 and 200 courses. (Both are pre-requisites for ICS 300.) This course is required for those jurisdictions that choose to comply with the National Incident Management System (NIMS) ensuring they continue receiving their federal preparedness funding grants. We are recommending that jurisdictions identify middle management who will be acting in the role of incident commander or section chief during an event and enroll them in this course.

**References:** <http://training.fema.gov/emiweb/is/icsresource/trainingmaterials.htm>

**Course: (ICS-400) Advanced Incident Command System for Command and General Staff – Complex Incidents**

**Target Audience:** First Responders

**Course Provider:** Emergency Management Institute (FEMA)

**Course Length:** 16.0 hours

**Course Delivery:** Instructor led

**Course Description:** This course is intended to serve as a vehicle to share proven incident management strategies and practices as well as to enhance teamwork and coordination among all response agencies' officers directly responsible for emergency response to a WMD/terrorism incident or other "Incident of National Significance". The course is specifically intended for those emergency response personnel who have duties that require that they be directly involved in incident management or command at either a "field" Incident command post (ICP) or in a city, county, or regional emergency operations center (EOC).

**References:** <http://training.fema.gov/emiweb/is/icsresource/trainingmaterials.htm>

**Course: (G-191) Emergency Operations Center and Incident Command System Interface**

**Target Audience:** Emergency Response Personnel

**Course Provider:** Emergency Management Institute (FEMA)

**FOR OFFICIAL USE ONLY**

*Community Action Plan to a Complex Coordinated Terrorist Attack*

**Course Length:** 8 hours (1 day)

**Course Delivery:** Instructor led

**Course Description:** This course reviews ICS and EOC responsibilities and functions and depends heavily on exercises and group discussions to formulate the interface. The course provides an opportunity for participants to begin developing an interface between an Incident Management Team and EOC personnel.

**References:** <http://training.fema.gov/emiweb/is/icsresource/trainingmaterials.htm>

**Course: (E/L0912) – Preparing Communities for a Complex Coordinated Attack IEMC: Community Specific**

**Target Audience:** First Responders and Community Leaders

**Course Provider:** Emergency Management Institute (FEMA)

**Course Length:** 32 hours (4 days)

**Course Delivery:** Instructor led - Mobile Training Team

**Course Description:** The IEMC: Preparing Communities for a Complex Coordinated Attack (CCA) sponsored by FEMA is a community-specific training initiative designed to improve the ability of local jurisdictions to prepare for, protect against, and respond to complex coordinated attacks. The purpose of this course is to provide a no-consequence environment where participants from multiple disciplines can discuss and analyze the local, state, regional and federal capabilities required to respond to an attack involving coordinated assaults against multiple targets. Through briefings, case studies, facilitated discussions, and planning workshops, participants work through a community-specific attack scenario to identify gaps in their current plans as well as mitigation strategies. Course Goals include: Identify interdependencies and gaps in decisions, actions, and resources needed to respond to a complex coordinated attack; Increase situational awareness to inform community of the challenges faced by healthcare systems during a complex coordinated attack; Strengthen and exercise relationships with response partners and members of the whole community; and Understand the key issues that should be addressed in a unified regional response plan for a complex coordinated attack

**References:** <https://training.fema.gov/iemc/complexcoordattack.aspx>

**Course: (E-947) Emergency Operations Center and Incident Management Team Interface**

**Target Audience:** Emergency Response Personnel

**Course Provider:** Emergency Management Institute (FEMA)

**Course Length:** 8 hours

**Course Delivery:** Instructor led

**Course Description:** This course provides state and local emergency management officials with the knowledge and skills they need to operate an Emergency Operations Center (EOC) and interface it with an Incident Management Team (IMT). Reviewing responsibilities and functions, this course provides an opportunity for participants to begin developing an IMT/EOC

**FOR OFFICIAL USE ONLY**

*Community Action Plan to a Complex Coordinated Terrorist Attack*

interface for their community. Specific course topics covered include: Incident Command System Review; Responsibilities and functions of an Emergency Operations Center; Basic principles of a Multi-Agency Coordination System (MACS); Differing needs and assets of IMT and EOC; IMT/EOC Relationships and IMT/EOC Action Planning

**References:** <http://training.fema.gov/emiweb/is/icsresource/trainingmaterials.htm>

**Course: (E-948) – Situational Awareness and Common Operating Picture**

**Target Audience:** First Responders

**Course Provider:** Emergency Management Institute

**Course Length:** 32 hours (4 days)

**Course Delivery:** Online Training

**Course Description:** Situational Awareness (SA) and Common Operating Picture (COP) supports the Communications and Information Management Component of the National Incident Management Systems. This intermediate-level course on SA and COP is designed to improve the skills, knowledge, and capabilities of individuals and organizations involved in domestic emergency preparedness, response and recovery.

**References:**

<http://training.fema.gov/emiweb/is/icsresource/trainingmaterials.htm>

**Course: (IS-907) Active Shooter: What You Can Do.**

**Course Provider:** Emergency Management Institute (online)

**Course Description:** This course provides guidance to individuals, including managers and employees, so that they can prepare to respond to an Active Shooter situation. This course is not written for law enforcement officers, rather for non-law enforcement employees.

**References.** <https://training.fema.gov/is/courseoverview.aspx?code=IS-907>

***National Center for Biomedical Research and Training (NCBRT) at Louisiana State University***

**Course: (PER-219) A Prepared Jurisdiction: Integrated Response to a CBRNE Incident**

**Target Audience:** First Responders

**Course Provider:**

**Course Length:** 20.0 hours

**Course Delivery:** Instructor-Led Training

**Course Description:** This is a 2.5 day course designed to improve interagency collaboration during a chemical, biological, radiological, nuclear, or explosive (CBRNE) incident. Disciplines within a community must be able to recognize their roles and the roles of other first responder disciplines when preparing for and responding to disasters. The course examines integration and command structure within a jurisdiction.

**References:** <http://www.ncbrt.lsu.edu/catalog/catalog.aspx>

*Community Action Plan to a Complex Coordinated Terrorist Attack*

**Course: (PER-230) Incident Response to Terrorist Bombings (IRTB)**

**Target Audience:** Emergency Responders

**Course Provider:** Energetic Materials Research and Testing Center (EMTRC) at New Mexico Tech University

**Course Length:** 4.0 hours

**Course Delivery:** Mobile Training

**Course Description:** This is a performance-level (operations) course designed to prepare emergency responders to perform effectively and safely during bombing incidents, principally in support roles within the warm and cold zones of the incident scene. The course includes a familiarization with IEDs and explosive materials, and detailed training on critical response actions during pre- and post-detonation operations. In addition, the course addresses actions that emergency responders can take to prevent or deter bombing attacks against targets in their communities.

**References:** <http://www.emrtc.nmt.edu/training/irtb.php>

**Course: (PER-232) Initial Law Enforcement Response to Suicide Bombing Attacks (ILERSBA)**

**Target Audience:**

**Course Provider:** Energetic Materials Research and Testing Center (EMTRC) at New Mexico Tech University

**Course Length:** 8 hours

**Course Delivery:** Mobile Training

**Course Description:** This is a performance –level mobile course that addresses some of the major considerations a jurisdiction is required to answer when creating plans, procedures, and tactics to prevent and respond to suicide bombing incidents.

**References:** <http://www.emrtc.nmt.edu/training/ilersba.php>

**Course: (PER-265) Law Enforcement Response Actions for CBRNE Incidents (LERA)**

**Target Audience:** Law Enforcement

**Course Provider:** Center for Domestic Preparedness (CDP)

**Course Length:** 8.0 hours

**Course Delivery:** Mobile (non-resident) and residential

**Course Description:** Law Enforcement Response Actions for CBRNE Incidents (LERA) is a one-day training course designed to enable law enforcement personnel to respond effectively to chemical, biological, radiological, nuclear, or explosive (CBRNE) incidents. Participants in LERA will receive hands-on training in surveying and monitoring, decontamination, mass casualty triage, scene survey and safety, and the use of personal protective equipment (PPE).

**References:** <https://cdp.dhs.gov/training/courses/lera>

*Community Action Plan to a Complex Coordinated Terrorist Attack*

**Course: (PER-275) Law Enforcement Active Shooter Emergency Response (LASER)**

**Target Audience:** Law Enforcement

**Course Provider:** NCBRT at Louisiana State University

**Course Length:** 16.0 hours

**Course Delivery:** Instructor led - Mobile Training Team

**Course Description:** The Law Enforcement Active Shooter Emergency Response (LASER) course uses a mixture of classroom presentations, hands-on field training, and practical exercises to enhance the response capabilities of law enforcement officers in order to effectively respond to and stop an Active Shooter incident. This course aims to provide participants with the knowledge, skills, and abilities to rapidly deploy and neutralize violent offenders during active shooter incidents in order to prevent the loss of innocent lives.

**References:** <http://www.ncbrt.lus.edu/catalog/catalog.aspx>

**Course: (PER-328-W) Situation Assessment for Complex Attacks (SAFCA)**

**Target Audience:** Emergency Services/Public Safety First-line Supervisors

**Course Provider:** Frederick Community College

**Course Length:** 10.0 hours

**Course Delivery:** Online Training

**Course Description:** The SAFCA course is asynchronous, self-paced, web-based instruction designed to provide and education and training event for emergency services sector first-line supervisors and the public and private sector safety and security equivalent to recognize, report, and take appropriate actions for a complex attack

**References:**

[http://frederick.augusoft.net/index.cfm?method=ClassInfo.ClassInformation&int\\_class\\_id=6132](http://frederick.augusoft.net/index.cfm?method=ClassInfo.ClassInformation&int_class_id=6132)

**Course: (MGT-422-W) Complex Attacks Situational Awareness and Response (CASAR)**

**Target Audience:** First Responders

**Course Provider:** Frederick Community College

**Course Length:** 10.0 hours

**Course Delivery:** Online

**Course Description:** The CASAR course is asynchronous, self-paced, web-based instruction designed to provide critical knowledge and skills related to a potential complex terrorist attack on critical infrastructures. The course guides participants through a current comprehension of the threat of a complex attack initiated by homegrown or transnational terrorists. It includes an assessment of the leadership and intelligence relationship to situational awareness and continues by reviewing information sharing, crisis communications, and the hazards risk management process. The final element of the course is a web-based complex attack simulation in which students practice application of the

*Community Action Plan to a Complex Coordinated Terrorist Attack*

knowledge and skills imparted in the earlier lesson-based components of the course.

**References:** <http://www.frederick.edu/workforce-continuing-education/downloads/macem-casarpostcard.aspx>

**Federal Law Enforcement Training Center (FLETC)**

**Course:** Law Enforcement First Responder Training Program (LEFRTP)

**Target Audience:** Law Enforcement

**Course Provider:** Federal Law Enforcement Training Center (FLETC)

**Course Length:** 8.0 hours

**Course Delivery:** Residential

**Course Description:** LFRTP is designed to provide topics most applicable to law enforcement officers as first responders at the state and local levels, including response to criminal acts, terrorist attacks and other large-scale emergencies.

**References:** <https://www.fleetc.gov/training-program/law-enforcement-first-responder-training-program>

**Course:** (PER-335) Critical Decision Making for Complex Coordinated Attacks

**Target Audience:** Emergency responders: police, fire, and emergency medical services personnel, including those who are likely to assume command at some point during response to a complex coordinated attack.

**Course Provider:** NCBRT at Louisiana State University

**Course Length:** 16.0 hours

**Course Delivery:** Instructor-Led Training

**Course Description:** This course provides first responders from multiple disciplines with skills to manage the initial response to a large-scale attack in a chaotic environment during a complex coordinated attack (CCA). It aims to train responders in how to use intuitive skills such as observation, analysis, anticipation, and awareness to recognize the possibility of an attack involving multiple incidents of an extreme magnitude that inundate resources, exceed conventional tactics and strategies, and often require a joint response involving members from multiple disciplines and jurisdictions. Topics for discussion include recognizing the characteristics of a potential CCA; coordinating and integrating the response of multiple disciplines and agencies; managing resources; using information sharing and intelligence gathering to develop awareness; and solving problems using creative thinking. Participants will learn to gather and disseminate critical information accordingly in order to facilitate rapid analysis. They will also learn to recognize and prevent potential response obstacles or risks to safety including self-deployment and over convergence of assets. Participants will apply the skills learned in Critical Decision Making for Complex Coordinated Attacks through interactive activities, facilitated discussion, and practical application in a training environment.

**References:** <http://www.ncbrt.lsu.edu/catalog/catalog.aspx>

**Course: Law Enforcement and First Response Tactical Casualty Care (LEFR-TCC)**

**Target Audience:** First Responders

**Course Provider:** National Association of Emergency Medical Technicians

**Course Length:** 10 hours (one day)

**Course Delivery:** Instructor led

**Course Description:** LEFR-TCC is continuing education offered through the National Association of Emergency Medical Technicians' (NAEMT) Pre-Hospital Trauma Life Support (PHTLS) program. This course was developed in collaboration with the Denver Health Department of EMS Education, the Denver Police Department Metro SWAT unit, and the NAEMT's PHTLS Committee. It teaches public safety first responders (police, law enforcement officers, firefighters, and other first responders) the basic medical care interventions that can help save an injured responder's life until EMS practitioners can safely enter a tactical scene.

**References:** [www.naemt.org/education/LEFR-TCC/WhatIsLEFRTCC.aspx](http://www.naemt.org/education/LEFR-TCC/WhatIsLEFRTCC.aspx)

**Texas A&M Engineering Extension Service (TEEX)**

**Course: (MGT-346) EOC Operations for All-Hazards Events**

**Target Audience:** EOC personnel

**Course Provider:** Texas Engineering Extension Service (TEEX) at Texas A&M University

**Course Length:** 24.0 hours

**Course Delivery:** Mobile Training

**Course Description:** This course provides personnel who could be assigned to or work in an Emergency Operations Center (EOC) the skills necessary to effectively plan for and manage a large-scale incident by applying and implementing an all-hazards, multi-disciplinary, management team approach as described in the National Incident Management System (NIMS), with specific emphasis on the planning, resource, and information management processes.

**References:** <https://teex.org/Pages/default.aspx> (see EOC Operations for All Hazards Events Course)

**Course: (MGT-348) Medical Preparedness and Response for Bombing Incidents (MPRBI)**

**Target Audience:** First Responders (Medical)

**Course Provider:** Texas Engineering Extension Service (TEEX) at Texas A&M University

**Course Length:** 16 hours

**Course Delivery:** Mobile Training

**FOR OFFICIAL USE ONLY**

*Community Action Plan to a Complex Coordinated Terrorist Attack*

**Course Description:** This co-sponsored course, developed and delivered by TEEEX and EMRTC, provides a strong emphasis in developing a multi-discipline approach to response to bombing incidents. Essential first responder personnel who would be involved in the medical response to an explosive incident will be introduced to real-world event case studies and research-based information designed to enhance medical preparedness for and response to blast effects.

## **XI. EXERCISES**

---

### **1. Joint Counterterrorism Awareness Workshop Series (JCTAWS)**

**Sponsoring Agency:** National Counterterrorism Center, Department of Homeland Security, and Federal Bureau of Investigation

**Synopsis:** The JCTAWS program is designed to improve the ability of local law enforcement, fire, emergency medical, communication, and private sector communities to prepare for complex terrorist attacks. Course provides a no-consequence environment where participants from multiple disciplines can discuss and analyze the local, state, regional and federal capabilities required to respond to a complex terrorist attack.

**Training Objectives:** The workshop underscores the need for whole community response to:

- Review existing preparedness, response and interdiction plans, policies, and procedures related to a complex terrorist attack;
- Identify shortfalls in plans, operational capabilities, response resources, and authorities;
- Identify federal, state, and local resources—including grants, training, exercises, and technical assistance;
- Improve situational awareness, recognize best practices, and encourage information sharing among all stakeholders in the event of a complex terrorist attack;
- Examine healthcare system and clinical challenges unique to a complex terrorist attack employing small arms and explosives;
- Discuss a framework for immediate medical management of wounded in, or near, an attack site;
- Identify and share best practices and lessons learned from case studies in medical preparedness and response; and
- Examine the roles of the community and bystanders in a complex terrorist attack.

**Exercise Delivery:** Mobile Training Teams

**Methodology:** JCTAWS is a two-day on-site workshop that provides a forum for discussion and analysis of federal, state, regional and local capabilities that would be deployed or activated to respond to a complex Coordinated Terrorist Attack in and surrounding the jurisdiction.

*Community Action Plan to a Complex Coordinated Terrorist Attack*

- Day 1. JCTASWS begins with a plenary session that includes a regional threat analysis, presentation of the workshop scenario, and four breakout sessions for Operations, Senior Command, Hospital, and Community/Private-Public Sector, where participants discuss responses related to the scenario timeline.
- Day 2. Subject Matter Experts provide presentations on homemade explosives (HMEs) and improvised explosive devices (IEDs), high-threat integrated operations, clinical considerations, and bombing injury patterns and care. Breakout groups will include discussions to develop gap mitigation strategies and consider next steps to further the region's preparedness posture.

**Target Audiences:** Participants in the locally focused workshop will include personnel from the City, County, Regional, State, and Federal entities in law enforcement, fire departments, emergency medical services, fusion center(s), emergency management, public affairs, medical communities, as well as other key stakeholders from the private sector.

**Training Location:** Training takes place at the requesting jurisdiction

**Web Site:** [www.dhs.gov/obp](http://www.dhs.gov/obp)

**Contact Information:** [JCTAWS@anl.gov](mailto:JCTAWS@anl.gov)

**Funding.** Funding for the MJIEDSP program is provided by DHS

## 2. Multi-Jurisdictional Improvised Explosive Device Security Planning (MJIEDSP) Workshops

**Sponsoring Agency:** DHS Office of Bombing Prevention

**Synopsis:** MJIEDSP is a systematic process that fuses counter-IED capability analysis, training, and planning to enhance urban area IED prevention, Protection, mitigation and response capabilities. The MJIEDPS assists with collectively identifying roles, responsibilities, capability gaps and how to optimize limited resources within a multi-jurisdictional planning area. The Office of Bombing Prevention (OBP) works closely with communities to provide expertise on planning and operational requirements for IED incident preparedness in alignment with the National Preparedness Goal and Core Capabilities.

**Training Objectives:** The MJIEDSP process strengthens IED prevention, protection, mitigation, and response capabilities of specific communities by:

## FOR OFFICIAL USE ONLY

### *Community Action Plan to a Complex Coordinated Terrorist Attack*

- Identifies requisite counter-IED capabilities and assets (with associated gaps).
- Defines steady-state and threat-initiated tasks specific to a particular community.
- Emphasizes National Incident Management System (NIMS)-compliant Mutual Aid Agreements.

**Methodology:** The MJIEDPS process include coordination with stakeholders from the planning are to conduct familiarization briefs and training, data collection activities, and facilitated scenario-based workshops. MJIEDPS workshops engage stakeholders in a discussion of cross-discipline, multi-agency, multi-jurisdictional response to multiple IED attacks within the planning area that identifies key threats and vulnerabilities; practices to integrate and maximize available resources; and steady-state and threat-initiated actions to reduce the risk of IED attacks. OBP offers three types of MJIEDSP workshops:

- *First Responders* - Assists the first responder community, including the private sector, in understanding and identifying the unique operational aspects of responding to IED incidents.
- *Bomb Squad/SWAT Interoperability* – Focuses on tactical coordination of bomb squads and SWAT Teams in responding to EID incidents involving active shooters.
- *Executive Level* – Provides high level decision makers with a greater understanding of the unique challenges associated with responding to large scale IED incidents.

**Target Audiences:** First Responders; Bomb Squad-Special Weapons and Tactics Teams; high level decision makers (agency executives and elected officials)

**Training Location:** Training takes place at the requesting jurisdiction

**Web Site:** [www.dhs.gov/obp](http://www.dhs.gov/obp)

THIS PAGE INTENTIONALLY LEFT BLANK

**FOR OFFICIAL USE ONLY**

## XII. COMMUNITY ENGAGEMENT

---

### Be Aware

#### Task 12.1. “See Something, Say Something”

**Discussion.** To report suspicious activity please contact your local law enforcement. Describe specifically what you observed, including:

- Who or what you saw;
- When you saw it;
- Where it occurred; and
- Why it's suspicious.
- If there is an emergency, call 9–1–1.

#### References.

- <https://www.dhs.gov/see-something-say-something>

#### Task 12.2. Become a Community Partner with “See Something, Say Something” Campaign

**Discussion.** The "If You See Something, Say Something®" campaign forms partnerships to help reach the public across the nation. Our partners increase awareness by displaying the campaign's messages and distributing outreach materials, including Public Service Announcements (PSAs).

Partners include, but are not limited to:

- States, cities, and counties
- Airports and mass transit entities
- Sports leagues and teams
- Major sports events and entertainment venues
- Colleges and universities
- Fairs and festivals
- Private sector businesses
- Media outlets

To become a partner, send an email to [seesay@hq.dhs.gov](mailto:seesay@hq.dhs.gov)

#### References.

- <https://www.dhs.gov/see-something-say-something/become-partner>

#### Task 12.3. Train as an Infrastructure Liaison Officer.

**Discussion.** Texas seeks to build a robust statewide network of public and private sector volunteers helping Texas law enforcement reduce vulnerabilities to critical infrastructure. The Texas Joint Crime Information Center's Infrastructure Liaison Officer (ILO) program is a network of trusted citizen volunteers or law enforcement officers recruited and trained to help Texas protect its infrastructure from crime, sabotage, and terrorism. ILOs are partners of the state's primary fusion center, the JCIC, which house a diversity of local, state and federal law enforcement agencies working together under one roof. ILOs are trained to see

*Community Action Plan to a Complex Coordinated Terrorist Attack*

and report suspicious activities. In turn, the JCIC can use the reporting to create investigative leads and awareness to guard against threats.

**References.**

- <http://www.dps.texas.gov/IntelligenceCounterTerrorism/ictILOBrochure.pdf>
- [tip@dps.texas.gov](mailto:tip@dps.texas.gov)

**Task 12.4. Train in the Bomb Making Materials Awareness Program**

**Discussion.** The Bomb-Making Materials Awareness Program (BMAP) is a national outreach program, sponsored by the Department of Homeland Security (DHS) in partnership with the Federal Bureau of Investigation, designed to increase public and private sector awareness of the use of homemade explosive (HME) precursor chemicals, explosive powders, and improvised explosive device (IED) components. Through increased awareness, BMAP builds a network of vigilant and informed private sector partners who serve as the Nation's counter-IED "eyes-and-ears" as the first line of defense in providing early detection of the sale of HME precursor chemicals to suspect individuals. Program Description BMAP provides the training, tools, and resources that help local first responders and other community outreach officers engage a wide range of private sector establishments within their jurisdictions that manufacture, distribute, or sell products that contain HME precursor chemicals or explosive powders.

Participants who attend the BMAP training become BMAP Outreach Officers who reach out to local businesses in their jurisdictions to help employees identify relevant HME precursor chemicals, explosive powders, potential critical IED components, suspicious purchasing behavior, and proper reporting procedures. The program simultaneously encourages stronger relationships between businesses and local law enforcement, and reinforces the foundation of effective community safety and security. This program serves to

- Enhance public/private partnerships
- Increase private sector point-of-sale awareness
- Increase identification of suspicious purchasing behavior and reporting
- Promote community-based policing
- Provide free, secure access to training and awareness materials
- Provide reporting mechanisms to track and measure success
- Strengthens prevention opportunities

## **Volunteer**

### **Task 12.5. Volunteer for Community Emergency Response Teams (CERT)**

**Discussion.** The Community Emergency Response Team (CERT) Program educates individuals about disaster preparedness and trains and organizes teams of volunteers that can support their communities during disasters. The CERT Program offers training in basic disaster response skills, such as fire safety, light search and rescue, and disaster medical operations. With proper CERT training, citizens can help protect their families, neighbors, and co-workers if a disaster occurs.

#### **References.**

- *IS-317: Introduction to Community Emergency Response Teams*  
<https://training.fema.gov/is/courseoverview.aspx?code=IS-317>

### **Task 12.6. Support/Participate Citizen Corps Programs and initiatives.**

**Discussion:** Our Nation's Citizen Corps was created "to harness the power of every individual through education, training and volunteer service to make communities safer, stronger, and better prepared to respond to the threats of terrorism, crime, public health issues, and disaster of all kinds."

Citizen Corps Programs include: Community Emergency Response Teams; Medical Reserve Corps; Neighborhood Watch; The Fire Corps; and the Volunteers for Police Program

#### **References:**

- <https://www.ready.gov/citizen-corps>

### **Task 12.7. Volunteer for Medical Reserve Corps**

**Discussion.** The Medical Reserve Corps is an element of the national Citizens Corps. It organizes volunteers to increase the capacity of medical teams to respond in the event of a tragedy. The Medical Reserve Corps (MRC) is a national network of volunteers, organized locally to improve the health and safety of their communities. The MRC network comprises approximately 190,000 volunteers in 900 community-based units located throughout the United States and its territories.

MRC volunteers include medical and public health professionals, as well as other community members without healthcare backgrounds. MRC units engage these volunteers to strengthen public health, improve emergency response capabilities and build community resiliency. They prepare for and respond to natural disasters, such as wildfires, hurricanes, tornados, blizzards, and floods, as well as other emergencies affecting public health, such as disease outbreaks. They frequently contribute to community health activities that promote healthy habits.

#### **References.**

- <https://MRC.hhs.gov/homepage>

**Task 12.8. Encourage medical training for members of the community to provide bystander care.**

**Discussion.** Municipal and county agencies should provide training in TECC First Care Provider guidelines. Offer and encourage training to members of government agencies, CERT Teams, Scouts, and other community organizations to initiate bystander care under TECC First Care Provider guidelines prior to the arrival of EMS.

**References.**

- “A Tactical Medicine After-action Report of the San Bernardino Terrorist Incident,” by Joshua Bobkin, Mrinal Sinha, and David Chen, *Western Journal of Emergency Medicine: Integrating Emergency Medical Care with Population Health* January 1, 2018. (page 291)
- <https://scholarship.org/uc/item/7zf9j4w1>

**Task 12.9. Train in Psychological First Aid**

**Discussion.** Psychological First Aid is crisis counseling, designed to address the difficult transition that some disaster survivors may suffer between the immediate aftermath and to the long road ahead to recovery. First authorized by Congress in 1974 as part of the Disaster Relief Act, crisis counseling programs are funded by FEMA and implemented by the state.

Psychological First Aid online includes a 6-hour interactive course that puts the participant in the role of a provider in a post-disaster scene. This professionally-narrated course is for individuals new to disaster response who want to learn the core goals of PFA, as well as for seasoned practitioners who want a review. It features innovative activities, video demonstrations, and mentor tips from the nation’s trauma experts and survivors. PFA online also offers a Learning Community where participants can share about experiences using PFA in the field, receive guidance during times of disaster, and obtain additional resources and training.

**References.**

- <https://learn.nctsn.org/enrol/index.php?id=38>

**Task 12.10. Expand upon the Neighborhood Watch Program.**

**Discussion.** The Neighborhood Watch Program is another element of the Citizens’ Corps that focuses on crime prevention in the community. The National Neighborhood Watch Program unites law enforcement agencies, private organizations, and individual citizens in a nation-wide effort to reduce crime and improve local communities. The Neighborhood Watch program empowers citizens to become active in community efforts through participation in Neighborhood Watch groups. This existing program can be expanded upon to increase awareness of terrorism and terrorist activities –and also address helping those disabled or in need of assistance in the aftermath of a tragedy/disaster.

**References.**

- <http://www.nnw.org/>

**Task 12.11. Volunteers In Police Service (VIPS) Program**

**Discussion.** Volunteers in Police Service is a locally-driven Citizen Corps program that allows community members to offer their time and talents to their local law enforcement agency. The Volunteers in Police encourages individuals to provide support local police departments and sheriff's offices. Volunteers in Police Service serves both a volunteer's desire to serve as well as a law enforcement agency's need for support. It increases law enforcement's outreach capacity during times of emergencies.

**References.**

- <http://nnw.org/volunteers-police-service-vips>

**Task 12.12. Volunteer for Fire Corps**

**Discussion.** The Fire Corps is an element of the national Citizens Corps. It advocates the use of trained volunteers to provide support to local fire services and rescue teams in order to increase their capacity in the event of a tragedy. The mission of Fire Corps is to increase the capacity of volunteer, career, and combination fire and EMS departments through the use of citizen advocates. Fire Corps provides resources for departments to utilize citizen advocates in non-operational roles so they can develop, implement, and sustain programs and services that will help their department meet the needs of their community.

**References.**

- <https://www.firecorps.org/>

**Task 12.13. Establish Psychological First Aid Teams**

**Discussion.** In order to increase the response to train for PFA, organize teams among various associations and organizations to undergo training together and to respond to emergencies or disasters. Experience has shown that volunteers are more comfortable in participating and responding as a group.

**References.**

- <https://learn.nctsn.org/enrol/index.php?id=38>

***Personal Preparedness***

**Task 12.14. Create an Emergency Plan for your family**

**Discussion:** Make a plan today. Your family may not be together if a disaster strikes, so it is important to know which types of disasters could affect your area. Know how you'll contact one another and reconnect if separated. Establish a family meeting place that's familiar and easy to find. FEMA provides an assortment of plans at its web site [www.ready.gov](http://www.ready.gov).

**References:**

- <https://www.ready.gov>

*Community Action Plan to a Complex Coordinated Terrorist Attack*

**Task 12.15. Make up a “Go Kit” for your family**

**Discussion:** After an emergency, you and your family may need to survive on your own for several days. Being prepared means having your own food, water and other supplies to last for at least 72 hours. A disaster supplies kit is a collection of basic items your household may need in the event of an emergency. Keep this kit in a designated place and have it ready in case you have to leave your home quickly. Make sure all family members know where the kit is kept.

**References:**

- <https://www.ready.gov>

**Task 12.16. Take online DHS/FEMA Courses**

**Discussion:** Citizens may take free online courses offered by DHS and the FEMA Emergency Management Institute and gain more knowledge to help their communities become more prepared. Example courses are:

**IS-907 Active Shooter: What You Can Do.**

**Course Description:** This course provides guidance to individuals, including managers and employees, so that they can prepare to respond to an Active Shooter situation. This course is not written for law enforcement officers, rather for non-law enforcement employees.

**References.**

- <https://training.fema.gov/is/courseoverview.aspx?code=IS-907>

**IS-909 Community Preparedness: Implementing Simple Activities for Everyone**

**Course Description:** Community members are the key to our Nation’s preparedness and resilience. As such, we need to: Support the development of prepared, vigilant, and engaged communities; Foster strategic partnerships among; the private sector; Nongovernmental organizations; Foundations; and, Community-based organizations. The purpose of this course is to present a model program for community preparedness. In addition, resources materials are available to help organizations conduct simple preparedness activities for everyone.

By the end of this course, participants will be able to:

- Identify the definition of preparedness.
- Describe the role of individuals and households in preparedness.
- Identify community preparedness principles.
- Describe the purpose of community-based preparedness activities.
- Identify the steps for planning and conducting a community-based preparedness program.
- Identify resources for supporting community-based preparedness programs.

**References.**

- <https://training.fema.gov/is/courseoverview.aspx?code=IS-909>

## **Business Preparedness**

### **Task 12.17. Participate in InfraGard**

**Discussion.** InfraGard is a partnership between the FBI and the private sector. It is an association of persons who represent businesses, academic institutions, state and local law enforcement agencies, and other participants dedicated to sharing information and intelligence to prevent hostile acts against the United States. The InfraGard program provides a vehicle for seamless public-private collaboration with government that expedites the timely exchange of information and promotes mutual learning opportunities relevant to the protection of Critical Infrastructure.

**References:**

- [www.infragard.org](http://www.infragard.org)

### **Task 12.18. Take a Business Preparedness Assessment to gauge your business' ability to survive a disaster.**

**Discussion:** Create a business continuity plan to ensure that your business can quickly adapt and continue in the wake of a disaster.

**References:**

- <https://www.readyrating.org/How-It-Works>

### **Task 12.19. Establish an Emergency Plan for your Business.**

**Discussion:** More than 40% of businesses never recover after a disaster. Recent survey found that 62% state that they do not have an emergency plan in place for their business. Make a plan.

**References:**

- <https://www.youtube.com/watch?v=2U0EFYKGn50&feature=youtube>
- [www.ready.gov/business](http://www.ready.gov/business)

### **Task 12.20. Create a Business Continuity Plan to help your business survive a disaster.**

**Discussion:** Create a business continuity plan to ensure that your business can quickly adapt and continue in the wake of a disaster.

**References:**

- [www.ready.gov/business](http://www.ready.gov/business)
- <https://www.fema.gov/media-library/assets/videos/80069>

### **Task 12.21. Save Important Business Documents to the Cloud.**

**Discussion.** Save important documents to the cloud for quick access after an incident/disaster.

**References:**

- <https://www.ready.gov/business-toolkit>

**Task 12.22. Provide Organizational Training in Active Shooter Incidents.**

**Discussion.** Train your business employees, students, or organization members in the appropriate response to Active Shooter incidents.

**References:**

- <https://www.bing.com/videos/search?q=youtube+videos+-+Emergency+Plan+for+Businesses&view=detail&mid=3C5A018BDB78BC7C9CA93C5A018BDB78BC7C9CA9&FORM=VIRE>

**Task 12.23. Establish Trauma/Mass Casualty Incident equipment stations in select public spaces.**

**Discussion.** In order to facilitate initial bystander care in the wake of Active Shooter and CCTA incidents, establish trauma/MCI equipment stations in select high-traffic locations accessible by the public. Consider co-locating these equipment stations with those currently established for Automated External Defibrillators (AEDs).

**References.**
